now a classic in the field the horrors of the half known life is an important foundational text in the construction of masculinity female identity and the history of midwifery

Repère

2004-11-23

this first of two volumes extends from the founding of the colony of georgia in 1733 up to the progressive era from the beginning georgia women were instrumental in shaping the state yet most histories minimize their contributions the essays in this volume include women of many ethnicities and classes who played an important role in georgia s history though sources for understanding the lives of women

in georgia during the colonial period are scarce the early essays profile mary musgrove an important player in the relations between the creek nation and the british crown and the loyalist elizabeth johnston who left georgia for nova scotia in 1806 another essay examines the near mythical quality of the american revolution era accounts of georgia s war woman nancy hart the later essays are multifaceted in their examination of the way different women experienced georgia s antebellum social and political life the tumult of the civil war and the lingering consequences of both the conflict itself and emancipation after the war both necessity and opportunity changed women s lives as educated white women like eliza andrews established or taught in schools and as african american women like lucy craft laney who later founded the haines institute attended school for the first time georgia women also profiles reform minded women like mary latimer mclendon rebecca latimer felton mildred rutherford nellie peters black and martha berry who worked tirelessly for causes ranging from temperance to suffrage to education the stories of the women portrayed in this volume provide valuable glimpses into the lives and experiences of all georgia women during the first century and a half of the state s existence historical figures include mary musgrove nancy hart elizabeth lichtenstein johnston ellen craft fanny kemble frances butler leigh susie king taylor eliza frances andrews amanda america dickson mary ann harris gay rebecca latimer felton mary latimer mclendon mildred lewis rutherford nellie peters black lucy craft laney martha berry corra harris juliette gordon low

The Horrors of the Half-Known Life

1937

mario carranza studies in depth the linkages between indo pakistani nuclear relations and the international nuclear order he critically analyzes the de facto recognition by the united states of india and pakistan as nuclear weapon states and looks at the impact of that recognition on the international nuclear order and its linchpin the nuclear non proliferation treaty npt the book provides a critical analysis of the new international nuclear order sponsored by the united states after the september 11 terrorist attacks and the place of india and pakistan in that order the author considers the survival of india and pakistan in relation to a strategy of nuclear deterrence and debates the possibility of establishing a robust nuclear arms control regime in south asia as part of a broader effort to revive global nuclear arms control and disarmament negotiations

although a few books are available on the use of computers in the school office this book is the first one addressing the topic of computer assisted school information systems siss for an international audience based on both practical and scientific international collaborative research this book analyzes the nature of siss their intended benefits and history presents the development strategies and the characteristics of three siss that are widely used in various parts of the world reviews what has been learned from the research over the last decade to inform successful design and implementation of siss presents exciting perspectives on the future of siss from experts vendors and users and reflects on what needs to be done to promote the full utilization of siss by clerical and managerial school staff through better system design user support and continuing research the book has been written for an international audience of students researchers system designers and implementers practitioners and policy makers in developing as well as in developed countries it will also be of benefit to professionals in the field of school administration and school management to help them promote better use of sis in their own context by learning from the experience of others

International Trade and Sustainability

1989

this the first volume in the history of wales provides a detailed history of wales in the period in which it was created out of the remnants of roman britain it thus begins in the fourth century with accelerating attacks from external forces and ends shortly before the norman conquest of england the narrative history is interwoven with chapters on the principal sources the social history of wales the church the early history of the welsh language and its early

literature both in welsh and in latin in the fourth century contemporaries knew of the britons but not of wales in the modern sense charles edwards therefore includes the history of the other britons when it helps to illuminate the history of what we now know as wales although an early form of the name wales existed it was a word in the germanic languages including english and meant inhabitants of the former roman empire it therefore covered the gallo romans of what we know as france as well as the britons

an expansive case for bibliography as infrastructure in information science cats carpenters and accountants argues that bibliography serves a foundational role within information science as infrastructure and like all infrastructures it needs and deserves attention wayne de fremery s thoughtful provocation positions bibliography as a means to serve the many ends pursued by information scientists he explains that bibliographic practices such as enumeration and description lie at the heart of knowledge practices and cultural endeavors but these kinds of infrastructures are difficult to see in this book he reveals them and the ways that they formulate information and meaning artificial intelligence and human knowledge drawing on scholarship from areas as diverse as data science machine learning korean poetry and the history of bibliography de fremery makes the case for understanding bibliography as a generative mode of accounting for what has been received as data what he calls carpentry accounting referencing a well known debate in the anglo american bibliographical tradition that features a willful cat he suggests that bibliography and bibliographers are intentionally marginal figures who paradoxically perform foundational work in the service of the diverse disciplinary ends that formulate however loosely information science as a field when we attend to the marginal but essential work of accounting for what humankind has fashioned as recorded knowledge it becomes easier to consider the ways that human accounts can serve and sometimes injure us relevant to scholars and students from the sciences to the humanities cats carpenters and accountants is a highly original argument for bibliography as a marginal but foundationally powerful force shaping information science

as a field and the ways that we know

Information Technology in Educational Management

2012-11-29

from the author of the critically acclaimed elvis presley biography last train to memphis brings us the life of sam phillips the visionary genius who singlehandedly steered the revolutionary path of sun records the music that he shaped in his tiny memphis studio with artists as diverse as elvis presley ike turner howlin wolf jerry lee lewis and johnny cash introduced a sound that had never been heard before he brought forth a singular mix of black and white voices passionately proclaiming the vitality of the american vernacular tradition while at the same time declaring once and for all a new integrated musical day with extensive interviews and firsthand personal observations extending over a 25 year period with phillips along with wide ranging interviews with nearly all the legendary sun records artists guralnick gives us an ardent unrestrained portrait of an american original as compelling in his own right as mark twain walt whitman or thomas edison

there has never been a motivational book like turning to into for based on the author s philosophy that the most important of life s lessons are preceded by a test the book is composed of two parts the test and the lesson the test the autobiographical first part is the riveting story of a boy who was abandoned as a toddler and left to grow up in an abusive foster home where he was abused molested and encouraged to steal until at age nine when he was given a gun and taken under the wings of the neighborhood gang leader the lesson the second part will empower the reader as the author shares the life s lessons born of unimaginable pain and suffering which enabled him to with only a ninth grade education become an international computer consultant inspired to teach the principles that enabled him to escape becoming a tragic statistic he abandoned a very lucrative career founded a nonprofit organization and became an internationally renowned educator recognized among other honors by the george w bush white house for his work with at risk and underprivileged populations the power of these lessons was called on once again when in 2014 cancer struck through treatment and faith the cancer was eradicated but the author was left paralyzed from the waist down the amazing result of what could have ended in tragedy was the reemergence of one of america s most dynamic motivational speakers turning to into for will inspire you empower you and teach you the principles of what the author has demonstrated by way of his remarkable life that which will help you to overcome the obstacles that cause so many of us to fail the concepts and strategies in this work will strengthen you and help you to develop a powerful relentless mental attitude that refuses to accept defeat i never lose i either win or learn but i never ever lose
