taking as its focus memorials of the first world war in britain this book brings a fresh approach to the study of public symbols by exploring how different motives for commemorating the dead were reconciled through the processes of local politics to create a widely valued form of collective expression it examines how the memorials were produced what was said about them how support for them was mobilized and behaviour around them regulated these memorials were the sites of contested multiple and ambiguous meanings yet out of them a united public observance was created the author argues that this was possible because the interpretation of them as symbols was part of a creative process in which new meanings for traditional forms of memorial were established and circulated the memorials not only symbolized emotional responses to the war but also ambitions for the post war era contemporaries adopted new ways of thinking

about largely traditional forms of memorial to fit the uncertain social and political climate of the inter war years this book represents a significant contribution to the study of material culture and memory as well as to the social and cultural history of modern warfare

what does it mean to own something what sorts of things can be owned and what cannot how does one relinquish ownership what are the boundaries between private and public property over the course of a decade the french revolution grappled with these questions punctuated by false starts contingencies and unexpected results this process laid the foundations of the napoleonic code and modern notions of property as rafe blaufarb demonstrates in this ambitious work the french revolution remade the system of property holding that had existed in france before 1789 the revolutionary changes aimed at two fundamental goals the removal of formal public power from the sphere of property and the excision of property from the realm of sovereignty the revolutionaries accomplished these two aims by abolishing privately owned forms of power such as jurisdictional lordship and venal public office and by dismantling the crown domain thus making the state purely sovereign this brought about a great demarcation a radical distinction between property and power from which flowed the critical distinctions between the political and the social state and society sovereignty and ownership the public and private it destroyed the conceptual basis of the old regime laid the foundation of france s new constitutional order and crystallized modern ways of thinking about politics and societies by tracing how the french revolution created a new legal and institutional reality

the great demarcation shows how the revolutionary transformation of old regime property helped inaugurate political modernity
