Social Psychology

2002

scientific discoveries often build on and are inspired by previous discoveries if the scientific enterprise were a tower of blocks each piece representing a scientific finding scientific progress might entail making the tower bigger and better block by block discovery by discovery rather than strong wooden blocks imagine the blocks or scientific findings can take on shape based on scientific accuracy the most accurate pieces are the strongest and sturdiest while the least accurate are soft and pliable building a tower of the scientific enterprise with a large number of inaccurate blocks will cause the tower to start to wobble lean over and potentially collapse as more and more blocks are placed upon weak and faulty pieces

Brunner & Suddarth's Textbook of Canadian Medical-surgical Nursing

2009

this volume is composed of four major in depth yet pedagogic review chapters on the subject of star formation written by the foremost researchers in the field recent infrared and millimeter radio observations are respectively reviewed by charlie lada and phil myers both of harvard smithsonian center for astrophysics the theoretical work is reviewed by frank shu of uc berkeley on the gravitational collapse of dense cores in a giant molecular cloud to form sunlike stars and bruce elmegreen of ibm watson on the gravitational instability leading to large scale star formation they have written at a level most suitable for graduate students or young researchers who want to develop their research interest in the field with the most complete literature survey to date this volume is not an ordinary conference proceedings but a textbook to be used in graduate study in astrophysics the volume also includes other short and interesting contributions from doug lin of uc santa cruz paul ho of harvard smithsonian masa hayashi of tokyo university debra elmegreen of vassar jing yao hu of beijing observatory guo xuan sung of shanghai observatory chi yuan of ccny and asiaa and wen ping chen of central university taiwan contents the formation and early evolution of stars an observational perspective c j lada star forming molecular clouds p c myers the birth of sunlike stars f h shu star formation on a large scale b g elmegreen herbig ae be stars j y hu observations of circumstellar disks with millimeterwave molecular line and continuum emissions m hayashi circumstellar environments around young stars w p chen the galactic center p ho observations of large scale star forming regions and density wave triggering d m elmegreen protostellar disks and the solar nebula d n c lin early evolution of planet forming disks c yuan giant molecular clouds and star formation on the galactic scale g x song readership graduate students and research scientists in astronomy and astrophysics keywords
