the untold almost unbelievable story of the daring pilots who risked their lives in an unprecedented air race in 1919 and put american aviation on the map years before charles lindbergh s flight from new york to paris electrified the nation a group of daredevil pilots most of them veterans of the world war i brought aviation to the masses by competing in the sensational transcontinental air race of 1919 the contest awakened americans to the practical possibilities of flight yet despite its significance it has until now been all but forgotten in the great air race journalist and amateur pilot john lancaster finally reclaims this landmark event and the unheralded aviators who competed to be the fastest man in america his thrilling chronicle opens with the race s impresario brigadier general billy mitchell who believed the nation s future was in the skies mitchell s contest critics called it a stunt was a risky undertaking given that the dh 4s and fokkers the contestants flew were almost comically ill suited for long distance travel engines caught fire in flight crude flight instruments were of little help in clouds and fog and the brakeless planes were prone to nosing over on landing yet the aviators possessed an almost inhuman disregard for their own safety braving blizzards and mechanical failure as they landed in remote cornfields or at the edges of cliffs among the

most talented were belvin the flying parson maynard whose dog trixie shared the rear cockpit with his mechanic and john donaldson a war hero who twice escaped german imprisonment jockeying reporters made much of their rivalries and the crowds along the race s route exploded with everyday americans eager to catch their first glimpse of airplanes and the mythic birdmen who flew them the race was a test of endurance that many pilots didn t finish some dropped out from sheer exhaustion while others betrayed by their engines or their instincts perished for all its tragedy lancaster argues the race galvanized the nation to embrace the technology of flight a thrilling tale of men and their machines the great air race offers a new origin point for commercial aviation in the united states even as it greatly expands our pantheon of aviation heroes

Address of ... Mayor ... 1877

from the preface this book was required as a former professor of military history at the american military university amu and a retired usaf colonel i wanted to teach a course on the effects of fighter aviation in war in addition i wanted to create a course that was a hands on approach to fighter aviation history having flown usaf fighters for more than 20 years i felt i had a good working knowledge of fighter aviation but when i researched the subject i found i would have to ask my students to read scores of books to provide the background they would need there was no single source book that covered everything i wanted to cover i determined to write that book i wanted to write a straightforward book in plain language that would not bore fighter pilots and at the same time that would be simple enough to be attractive to laymen as well as air power historians that is what i have done i have covered some detailed thoughts about fighter flying in

what southern americans might call biscuits and gravy language the overriding premise of the text is that the fighter has been the key element in the air power equation and continues in that role today although this role may be changing with the advent of good reliable beyond visual range air to air missies this view has not been universally held over the years however it is a view that has been held by fighter pilots since the advent of the fighter more and more historians are beginning to support this view table of contents world war i fighter development between wars the air wars between world wars fighter development in world war ii the korean war the fighter in the vietnam war the arab israeli wars the india pakistani conflicts the air war in the falklands soviet experience in afghanistan the persian gulf war the future summary and conclusions appendices definitions
