the transition from school to vocational education is of different quality and performance in the diverse national vet systems and heavily determined by the different structures of governance in the national education and vet systems in september 2009 the international network on innovative apprenticeship inap hosted its third international conference in turin bringing together leading researchers in the area of international tvet research this book summarises all topics discussed within the frame of the turin conference and overviews current research and analysis in the following fields managing successful transitions from school to work building vocational identity competence evaluation and development in vet levels of governance and the role of stakeholders in apprenticeships

Signal Processing and Networking for Big Data Applications

2017-04-27

disgorgement of profits is not exactly a household word in private law particularly in civil law jurisdictions as opposed to those of the common law the notion is not well known what does it stand for it is best illustrated by examples one of the best known being the british case of blake v attorney general 2001 1 ac 268 in which a double spy had been imprisoned by the uk

government before escaping and settling in the former soviet union while there wrote a book on his experiences upon which the uk government claimed the proceeds of the book the house of lords as it then was allowed the claim on the basis of blake s breach of his employment contract other examples are the infringement of intellectual property rights where the damages of the owner are limited but the profits of the wrongdoer immense in such cases the question arises whether the infringing party should be disgorged of his profits this volume aims at establishing the notion of disgorgement of profits as a keyword in the discourse of private law it does not purport to answer the question whether or not such damages should or should not be awarded it does however aim to contribute to the discussion the arguments in favour and against and the organisation of the various actions

the toxicology of radioactive substances volume 3 iron 59 deals with the experimental results of tests conducted at the radiotoxicology laboratory of the institute of occupational hygiene and disease academy of medical sciences u s s r the book focuses on studies made on iron 59 which is widely used in science and technology such as in the metal industry and in the research of hemoglobin metabolism in the bone marrow and red cells other studies show however that there is a long term detrimental effect of intake of iron 59 the text then gives a brief outline of the physical chemical and biological properties of iron research also shows that the body's reaction

to radioactive substances depends on how these are transmitted to the body and on their physicochemical properties the effect of prolonged administration of radioactive iron on the electrical activity of the cerebral cortex of animals is analyzed of which possibly the nervous system is most affected the book notes also the changes in the red blood cells during chronic administration of iron 59 in small doses wherein the hemoglobin levels increased temporarily studies of prolonged exposure to radioactive isotopes during pregnancy of the test animals show that there are significant changes in erythropoiesis associated with iron deficiency in another study the prolonged internal administration of radioactive substances showed phasic changes in the height of electrocardiographic waves of the test animals the text is suitable for physicists nuclear scientists doctors of toxicology and researchers in nuclear medicine

Social Relations in a Philippine Market

2022-06-03

Abstract: This study examines the social relations in a Philippine market, focusing on the interactions between different social groups and the impact of market forces on these relations. The study is based on a series of interviews and observations conducted in a market in the Philippines. The findings suggest that social relations are shaped by a combination of factors, including economic conditions, cultural norms, and power dynamics. The study also highlights the importance of social capital in the market and the need for policies that support the development of social relations.
