peter eisenman is one of the most controversial protagonists of the architectural scene who is known as much for his theoretical essays as he is for his architecture while much has been written about his built works and his philosophies most books focus on one or the other aspect by structuring this volume around the concept of form stefano corbo links together eisenman s architecture with his theory from formalism to weak form the architecture and philosophy of peter eisenman argues that form is the sphere of mediation between our body our inner world and the exterior world and as such it enables connections to be made between philosophy and architecture from the start of his career on eisenman has been deeply interested in the problem of form in architecture and has constantly challenged the classical concept of it for him form is not simply a cognitive tool that determines a physical structure which discriminates all that is active from what is passive what is inside from what is outside he has always tried to connect his own work with the cultural manifestations of the time firstly under the influence of colin rowe and his formalist studies secondly by re interpreting chomsky s linguistic theories in the 80 s by collaborating with derrida and his de constructivist approach more recently by discovering henri bergson s idea of time these different moments underline different phases different projects different programmatic manifestos and above all an evolving notion of form taking a multi disciplinary approach based on the intersections between architecture and philosophy this book investigates all these definitions and in doing so provides new insights into and a deeper understanding of the complexity of eisenman s work
