A History of the American People 2009-06-30 excerpt from social forces in american history it has seemed to me that these underlying social forces are of more importance than the individuals that were forced to the front in the process of these struggles or even than the laws that were established to record the results of the con ict in short i have tried to describe the dynamics of history rather than to record the accomplished facts to answer the question why did it happen as well as what happened an inquiry into causes is manifestly a greater task than the recording of accomplished facts it is certain that i have made some mistakes probably a great many in analyzing the underlying forces of so complex a thing as american social development the finding of such mis takes will prove nothing as to the method save that the leisure of ten very busy years in the life of one individual is all too short a time in which to trace to their origin the multitude of forces that have been operating in amer ican history about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Supervised Study in American History 2016-05-19 in the ten essays presented the author revisits events in american history popularly shaped through the years by bias and misconception one of the inherent dangers of a society's claims to exceptionalism is the blind and uncritical acceptance of historical narratives that are both incomplete and inconsistent with the reality of actual events whether dealing with relations between the indigenous american peoples and the first european settlers or the enterprise of attempting to engage in nation building in places like vietnam iraq and afghanistan history should be viewed and conducted as a cooperative enterprise dedicated to focusing on accurately complete narratives explanations and interpretations of historical events the freedom to critically evaluate the conclusions of others is essential for arriving at fair and complete descriptions of the past the necessity of being prepared to criticize honestly and rigorously reassess oneself is a key component of that exercise
