Muhammad and the People of the Book

2010-09-17

muhammad and the people of book by sahaja carimokam asks the question what was the nature of muhammad s relationship to non muslims particularly jews and christians and how did it change over time this work is based on a chronological reading of the chapters of the qur an supplemented with muslim commentary literature and biographical materials on the life of muhammad carimokam traces muhammad s evolving religious viewpoint based on his borrowings of primarily jewish and some christian traditional apocryphal materials he shows how muhammad s inaccurate and anachronistic rendition of jewish traditional literature ensured that the jews would reject him as a prophet this rejection lead to his ultimatum to the jews early in the medinan period of the qur an and culminated with his call to jihad against all non muslims including those jews and christians who refused to acknowledge his prophethood the origins of takfir declaring muslims to be non muslims are considered comparisons are made of moderate and traditional interpreters of the qur an historical critical issues regarding the background provided by muslim historical propaganda is considered in one chapter the book concludes with a controversial issue for the interpretation of islamic law in the 21st century based on the actual canonical practices of muhammad

Truth and Pluralism

2012-12-31

the relative merits and demerits of historically prominent views about truth such as the correspondence theory coherentism pragmatism verificationism and instrumentalism have been subject to much attention and have fueled the long lived debate over which of these views is the most plausible while diverging in their specific philosophical commitments adherents of these views are in agreement in at least one fundamental respect they are all alethic monists they endorse the thesis that there is only one property in virtue of which propositions can be true and so in this sense take truth to be one the truth pluralist on the other hand rejects this idea there are several properties in virtue of which propositions can be true the literature on truth pluralism has been growing steadily for the past twenty years this volume however is the first to focus specifically on pluralism about truth part i is dedicated to the development investigation and critical discussion of different forms of pluralism one additional reason to examine truth pluralism is the significant connections it bears to other debates in the truth literature particularly debates concerning traditional theories of truth and the deflationism inflationism divide parts ii and iii of the volume connect truth pluralism to these two debates

it is a well established fact nowadays that modernity impacts islam but there has not been much focus on how modernity impacts the qur ān the foundational text of islam and the verbatim word of god this book argues that the early muslim qur ān translations into english are attempts to reconcile the qur ān with modernity by producing translations that encompass modern concepts and interpretations of the qur ān are these modern concepts and interpretations valid or they alter the word of god this is the main question that the book attempts to answer particularly that these early translations have affected and still affect qur ān translation

Woodroffe and Ameer Ali's Law of Evidence Applicable to British India

1915

a new york times bestselling and widely admired catholic writer explores how we can retrieve transcendent faith in modern times critically acclaimed and bestselling author james carroll has explored every aspect of christianity faith and jesus christ except this central one what can we believe about and how can we believe in jesus in the twenty first century in light of the holocaust and other atrocities of the twentieth century and the drift from religion that followed what carroll has discovered through decades of writing and lecturing is that he is far from alone in clinging to a received memory of jesus that separates him from his crucial identity as a jew and therefore as a human yet if jesus was not taken as divine he would be of no interest to us what can that mean now paradoxically the key is his permanent jewishness no christian himself jesus actually

transcends christianity drawing on both a wide range of scholarship as well as his own acute searching as a believer carroll takes a fresh look at the most familiar narratives of all matthew mark luke and john far from another book about the historical jesus he takes the challenges of science and contemporary philosophy seriously he retrieves the power of jesus profound ordinariness as an answer to his own last question what is the future of jesus christ as the key to a renewal of faith

many engineering companies around the world are currently undergoing a quality control and improvement revolution that originally started in japan many decades ago and this book provides a brief overview of this revolution robust design is a central component of the modern approach to quality improvement and is a phrase used to describe any engineering activity whose objective is to develop high quality products and processes at low cost a key characteristic of robust design is

the use of statistically planned designed experiments to identify those process variables that determine product quality robust design was developed in japan by g taguchi in the early 1950s and its widespread use throughout japanese industry is one of the main reasons why the country has emerged as a major producer of relatively cheap high quality products especially in the automobile home electronics and microprocessing sectors despite its early success in japan robust design remained virtually untried in the united states and europe until the early 1980s however the realisation that quality is a vital ingredient required for success in today s highly global and competitive markets has since prompted western companies to embrace the robust design concept this book explores the planning implementation and analysis of experiments designed both to improve existing manufacturing process and to create newer and better processes and products
