<u>Sustainable and Energy Efficient Computing</u> Paradigms for Society

2020-08-31

this book provides insights into recent trends and innovation of technologies aiming to provide sustainable and energy efficient computing the authors discuss approaches to provide solutions to real life societal issues and problems using sustainable and energy efficient computing approaches the book gathers research and state of the art reviews on solutions for societal benefits by using sustainable approaches of computing the book also intends to provide use cases for certain real life societal problems the book can be used by researchers of similar areas technologists environmentalists educationists research scholars and ug pg students as well

2007-09

the event to provide a scientific forum that will appeal to them individual scholars practitioners policy makers especially post graduate students to present their experiences research findings sharing ideas and experiences for the nature of the object being discussed is interdisciplinary the post graduate school sps of syarif

hidayatullah state islamic university jakarta is called to organize international colloquium on interdisciplinary studies 2019 iciis 2019 with the theme moslem societies and social transformation in 2019 this event has been held in 7 9 november 2019 in the post graduate school of syarif hidayattullah state islamic university jakarta it is the conjunction with the 3rd international conference on guran and hadith studies iconguhas2019 the event is jointly organized and hosted by postgraduate school faculty of theology ushuluddin of syarif hidayattullah state islamic university jakarta paramadina university and islamic university of jakarta the conference papers from any kind of stakeholders and interdisciplinary studies related with religion and social related studies each contributed paper was refereed before being accepted for publication the double blind peer reviewed was used in the paper selection

ICIIS 2019

these proceedings are the work of researchers contributing to the 10th

international conference on cyber warfare and security iccws 2015 co hosted this year by the university of venda and the council for scientific and industrial research the conference is being held at the kruger national park south africa on the 24 25 march 2015 the conference chair is dr jannie zaaiman from the university of venda south africa and the programme chair is dr louise leenen from the council for scientific and industrial research south africa

Iccws 2015 - The Proceedings of the 10th International Conference on Cyber Warfare and Security

2015-02-24

this book highlights the latest innovations and applications in robotics as presented by leading international researchers and engineers at the romansy 2022 the 24th cism iftomm symposium on theory and practice of robots and manipulators held in udine italy on july 4 7 2022 the romansy symposium is the first established conference that

focuses on robotics theory and research rather than industrial aspects bringing together researchers from a broad range of countries the symposium is held bi annually and plays a vital role in the development of the theory and practice of robotics as well as the mechanical sciences romansy 2022 marks the 24th instalment in a series that began in 1973

ROMANSY 24 - Robot Design, Dynamics and Control

we have once again tested security products for smartphones running google s android operating system our report covers details of the products made by leading manufacturers smartphones represent the future of modern communications in 2013 more than 1 billion smartphones were sold a further milestone in the advance of these devices1 a study published by facebook emphasises the importance of smartphones in our lives about 80 of users make use of their smartphone within 15 minutes of waking up each day at the same time the traditional function of a telephone is becoming less and less

important the high quality of integrated cameras means that the smartphone is increasingly used for photography as well as with photos users trust their devices with their most personal communications such as facebook whatsapp and email this brings some risks with it as such usage makes the smartphone interesting for criminals who attempt to infect the device with malware or steal personal data there is also the danger brought by phishing attacks these days the use of security software on a pc or laptop is seen as essential however many smartphone users do not yet have the same sense of responsibility even though their devices store personal data private photos internet banking information or even company data as modern smartphones are often expensive to buy they are also an attractive target for thieves top quality smartphones cost several hundred euros as it is not possible to physically prevent them from being stolen they must be made less attractive to thieves consequently many of today s security products contain not only malware protection but also highly developed theft protection functions which make the device less attractive to

thieves e g by locking the device and help the owner to find it again

Mobile Security Products for Android

2014 - 10 - 14

this book offers a multidisciplinary strategy for finding new and more effective human computer interaction approaches in particular from a socio technical perspective that facilitate the exploration and exploitation of benefits that information technologies it offer organizations though the relationship between it and organizations is certainly very strong it is also one of the greatest obstacles to securing benefits from their interaction the participation of organizational users in the planning and design stages of it interfaces is the main area of human computer interaction where a wealth of contributions are positively enriching both the academic and management discussions thus a new approach for managing this relationship is needed one in which the different stakeholders are suitably taken into account moreover the outstanding success of the 2 O phenomenon offers an example of a relevant platform where human computer interaction has been widely developed and exploited consequently this will influence and already is influencing the way it

and users interact with each other the book is based on a selection of the best papers original double blind peer reviewed contributions from the annual conference of the italian chapter of the ais held in milan italy in december 2013

this book arose from courses taught by the authors and is designed for both instructional and reference use during and after a first course in algebraic topology it is a handbook for users who want to calculate but whose main interests are in applications using the current literature rather than in developing the theory typical areas of applications are differential geometry and theoretical physics we start gently with numerous pictures to illustrate the fundamental ideas and constructions in homotopy theory that are needed in later chapters we show how to calculate homotopy groups homology groups and cohomology rings of most of the major theories exact homotopy sequences of fibrations some important spectral sequences and all the obstructions that we can compute from these our approach is to mix illustrative examples with those proofs that actually develop transferable calculational aids we give extensive appendices with

notes on background material extensive tables of data and a thorough index audience graduate students and professionals in mathematics and physics

this book constitutes the refereed proceedings of the 8th international conference on grid and pervasive computing gpc 2016 held in seoul korea in may 2016 the 20 revised papers were carefully reviewed and selected from 94 submissions the conference contains various aspects including green computing cloud computing virtualisation data and storage and network security

A User's Guide to Algebraic Topology

1997-01-31

from a holistic perspective this handbook explores the design development and production of smart textiles and textile electronics breaking with the traditional silo structure of smart textile research and development leading experts from different domains including textile production electrical engineering interaction design and human computer interaction hci address production processes in their entirety by exploring important concepts and topics like textile manufacturing sensor and actuator development for textiles the integration of electronics into textiles and the interaction with textiles in addition different application scenarios where smart textiles play a key role are presented too smart textiles would be an ideal resource for researchers designers and academics who are interested in understanding the overall process in creating viable smart textiles

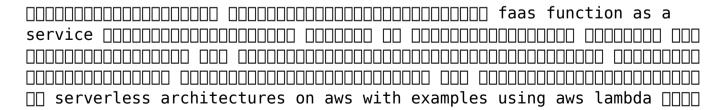

2016-05-02

this volume integrates multimodal theoretical frameworks with those from graphic communication and information design and applies this critical synthesis to the examination of the changes and relationships that occur when multimodal documents are distributed across various means and channels of consumption drawing on examples from popular newspapers and store catalogs the book s specific focus is on

documents as sets here defined as the collective of all the assorted forms of a document published across multiple mediums and modes this approach affords a multi layered analysis of multimodal documents more broadly in addition to engaging in questions about the very definition of a document and the terminology we use in relation to documents including genres mediums and modes as both a critical examination of the theoretical frameworks employed in literature on documents and a way forward for new approaches to analyzing multimodal texts this volume is key reading for students and scholars in multimodality graphic communication design media studies and information science

from data to actionable business insights using amazon quicksight about this book a practical hands on guide to improving your business with the power of bi and quicksight immerse yourself with an end to end journey for effective analytics using quicksight and related services packed with real world examples with solution architectures needed for a cloud powered business intelligence service who this book is for this book is for business intelligence architects bi developers big data architects and it executives who are looking to modernize their business intelligence architecture and deliver a fast easy to use cloud powered business intelligence service what you will learn

steps to test drive quicksight and see how it fits in aws big data eco system load data from various sources such as s3 rds redshift athena and salesforce and visualize using quicksight understand how to prepare data using guicksight without the need of an it developer build interactive charts reports dashboards and storyboards using quicksight access quicksight using the mobile application architect and design for aws data lake solution leveraging aws hosted services build a big data project with step by step instructions for data collection cataloguing and analysis secure your data used for quicksight from s3 redshift and rds instances manage users access controls and spice capacity in detail amazon quicksight is the next generation business intelligence bi cloud service that can help you build interactive visualizations on top of various data sources hosted on amazon cloud infrastructure quicksight delivers responsive insights into big data and enables organizations to quickly democratize data visualizations and scale to hundreds of users at a fraction of the cost when compared to traditional bi tools this book begins with an introduction to amazon quicksight feature differentiators from traditional bi tools and how it fits in the overall aws big data ecosystem with practical examples you will find tips and techniques to load your data to aws prepare it and finally visualize it using quicksight you will learn how to build interactive charts reports dashboards and stories using quicksight and share with others using just your browser and mobile app the book also provides a blueprint to build a real life big data project on top of aws data lake solution and demonstrates how to build a modern data lake on the cloud with governance data catalog and analysis it reviews the current product shortcomings features in the roadmap and how to provide feedback to aws grow your profits improve your products and beat your competitors style and approach this book takes a fast paced example driven approach to demonstrate the power of quicksight to improve your business efficiency every chapter is accompanied with a use case that shows the practical implementation of the step being explained

Design Perspectives on Multimodal Documents

spectrum sharing in wireless networks fairness efficiency and security provides a broad overview of wireless network spectrum sharing in seven distinct sections the first section examines the big picture and basic principles explaining the concepts of spectrum sharing hardware software function requirements for efficient sharing and future trends of sharing strategies the second section contains more than 10 chapters that discuss differing approaches to efficient spectrum sharing the authors introduce a new coexistence and sharing scheme for

multi hop networks describe the space time sharing concept introduce lte u and examine sharing in broadcast and unicast environments they then talk about different cooperation strategies to achieve mutual benefits for primary users pu and secondary users su discuss protocols in a spectrum sharing context and provide different game theory models between pus and sus the third section explains how to model the interactions of pus and sus using an efficient calculation method to determine spectrum availability additionally this section explains how to use scheduling models to achieve efficient su traffic delivery the subject of the fourth section is mimo oriented design it focuses on how directional antennas and mimo antennas greatly enhance wireless network performance the authors include a few chapters on capacity rate calculations as well as beamforming issues under mimo antennas power control is covered in the fifth section which also describes the interference aware power allocation schemes among cognitive radio users and the power control schemes in cognitive radios the sixth section provides a comprehensive look at security issues including different types of spectrum sharing attacks and threats as well as corresponding countermeasure schemes the seventh and final section covers issues pertaining to military applications and examines how the

military task protects its data flows when sharing the spectrum with civilian applications

Microprocessors

1983

this book constitutes the refereed proceedings of the 13th international conference on age information management waim 2012 held in harbin china in august 2012 the 32 revised full papers presented together with 10 short papers and three keynotes were carefully reviewed and selected from a total of 178 submissions the papers are organized in topical sections on wireless sensor networks data warehousing and data mining query processing spatial databases similarity search and queries xml and data graph and uncertain data distributed computing data security and management information extraction and integration and social networks and modern services

The Application of Mini- and Micro-computers in Information, Documentation, and Libraries

1988-04-25

attention coders are you earning less than 300 000 per year as a software engineer have you been grinding away as a junior or mid level developer for too long and the promotions aren t coming have you recently completed a coding boot camp and now you re in the deep end with no clear direction on how to advance your career this book can help you master the skills necessary to stand out at the top of our field while you wait for your next annual review you are helping to make your executive team rich while they pay you an entry level salary and consider you nothing more than a replaceable cog in the machine over the past 20 years working as a software professional i have been collecting extremely valuable lessons that have helped me become one of the highest paid most reliable developers in my network i no longer worry about money i no longer work overtime and instead of competing with my peers for promotions i now have companies competing with each

other for my time and skillset you don t need a college degree and you don t need to master a bunch of programming languages or become an expert at all the new libraries and frameworks to get where i am that is a waste of time and money and all you are doing is helping other people realize their goals instead of realizing your own the career ladder is simply a game of profits and resources and once you learn and understand how the people above you perceive value and who your clients really are you will soar past your colleagues if you don t want to spend years crawling your way to the top on your own like i did working twice as hard as everybody else just to get noticed for promotions then let me help you cut those years or even decades off that journey it s time to take control of your software career and kick it into high gear right now
