Manual transmission mt is a type of transmission in which the driver uses a stick to change gears. The design of most manual transmissions for cars is that gear ratios are selected by locking selected gear pairs to the output shaft inside the transmission. When the engine is running and the clutch is engaged i.e. clutch pedal up the flywheel spins the clutch pressure plate and hence the transmission.

Sequential manual transmission is a type of manual transmission in which the driver uses a stick to change gears. The design of most sequential manual transmissions for cars is that gear ratios are selected by locking selected gear pairs to the output shaft inside the transmission.

Stick shift or manual gearbox or standard transmission is a type of transmission in which the driver uses a stick to change gears.

literally in the past manual cars often had a dash mounted shifter or a steering column but nowadays in modern vehicles the gear stick is mounted vertically in the center
