this is the first fundamental text to focus specifically on forensic vocational rehabilitation a field that is forecast to grow rapidly forensic vocational rehabilitation consultants evaluate the vocational and rehabilitation needs of individuals in an array of legal settings such as civil litigation workers' compensation social security disability and others the text is unique in its exploration of the vocational rehabilitation process from a biopsychosocial perspective that views disability as a complex and multidimensional construct the book comprehensively describes the parameters and theoretical issues of relevance in evaluating and developing opinions in forensically oriented matters it culls and synthesizes current peer reviewed literature and research on this private subspecialty practice area of rehabilitation counseling including theories models methods procedures and fundamental tenets of the field also included is current information about the labor market life care planning and professional identity standards and ethics the text is designed for graduate and postgraduate students in rehabilitation counseling and psychology as well as practicing forensic vocational rehabilitation consultants and professionals moving toward practice in this arena chapters are authored by noted scholars or published practitioners in each subject area and include an introduction to the content area discussion of key terminology and concepts and a review of the current and historical literature with emphasis toward future research needs and evidence based

practice the book fulfills the requirement by the commission on rehabilitation education core for training in this subject area at the graduate level for new certification or certification maintenance key features comprises the only foundational text to focus specifically on forensic vocational rehabilitation synthesizes peer reviewed research into one authoritative source describes the role function and scope of practice of the rehabilitation counselor in private forensic vocational rehabilitation practice fulfills core requirements for certification

Evidence Based Labor and Delivery Management

2019-02-28

this book discusses preventive actions that have led to reduction in the prevalence of child labor across the world over the 21st century it identifies exemplary programs in the area of community prevention that have had exceptional results for example the involvement of children in hazardous work globally being reduced by half it documents a wide range of contexts where concerted action has counteracted social permissiveness towards child labor including psycho educational interventions in preventing early school leaving and conditional cash benefits which counteract family poverty the book presents a set of evidence based practices that are particularly useful for psychologists educators and social workers more broadly this book is also of interest to policymakers professionals and activists involved in child protection policy or in implementing programs to promote the psychological well being of children

Reference and Information Services

2013

most countries implement social protection programs to help individuals manage risks such as unemployment disability illness longevity or death in many middle income countries these are often based on a bismarckian model named after otto von bismarck where benefits are financed by contributions levied on salaried employment in countries with a large informal sector however only a fraction of the population is covered by this system and non contributory programs have been added or are planned to increase coverage this can create distortions in the labor market and the book is about policies to expand the coverage of social insurance programs to all workers without reducing incentives to job creation and formal work while few would argue against the need and social merits of social insurance and social assistance programs there are growing concerns about their unintended consequences on labor markets because of poor design the programs can distort incentives and individual behaviors in ways that either reduce employment levels and or promote informality ultimately affecting productivity and economic performance for instance high social security contribution rates can reduce formal employment badly designed unemployment benefits can reduce incentives to keep search and take jobs and fragmented social assistance programs can become a tax on formal labor and encourage informality the book reviews the evidence regarding the effects of social insurance and social assistance programs on labor market outcomes and discusses options to improve their design and implementation the book focuses particularly on middle income countries in latin america and asia with a large informal sector and suggests ways to reduce these distortions and better manage and finance the subsidies to make coverage universal while creating good jobs the book compiles expert papers from the joint conferences of the world bank wb the institute for the study of labor iza and the inter american development bank idb on employment and development

Social Insurance, Informality, and Labor Markets

2014-12-04

as measured by its per capita income nepal is one of the poorest countries in the world with large parts of its population trapped in poverty within a stunning but difficult to control natural environment under these conditions since the wake of the 21st century international labour migration and the associated remittances of large amounts of foreign exchange have rapidly gained influence on the country s economic and social development triggered by internal disturbances in particular economic downturn and political upheavals as well as external dynamics which boosted an uprising international demand for unskilled labour while there is hardly any basic dissent about the short to mid term positive growth effect for nepal s economy surprisingly little is known about the consequences of this form of livelihood security at the individual household level apart from some anecdotal evidence although neither policy makers nor ngos may effectively craft their strategies without considering this phenomenon this book was developed from an alumni workshop held in kathmandu in 2015 where focusing on this knowledge gap wide ranging original research about the consequences of family members absence and the receipt of remittances was presented moving on from this starting point the authors further elaborated their work to make it accessible to a broader public and exploitable as a resource for policy making and follow up research in addition this volume includes detailed facts and figures about outmigration from and inflow of remittances to nepal with a view to long term development implications of international migration it also considers the gain of knowledge and access to international academic networks brought into the country by returned scholars the editor of the volume béatrice knerr is a professor of development economics affiliated to the university of kassel germany where until 2015 she was heading the department of development economics migration and agricultural policy demap afterwards she has served as guest professor at the universidad autonoma de yucatan uady in merida mexico and at

the college of economics of hue university vietnam presently she is on contract with the brawijaya university of malang indonesia where she is joining research projects on rural development and teaching various modules in the economics faculty as an expert in the implications of labour migration on the development of low to middle income countries she has published and edited around 30 books and 100 journal articles and book chapters
