this oracle database develop pl sql program units training is designed for developers with basic pl sql and sql language skills develop execute and manage pl sql stored program units while gaining in depth knowledge of pl sql stored program units like procedures functions packages and database triggers learn to design pl sql packages oracle mooc introduction to pl sql program units session 1 getting started guide homework assignments are given at the end of each week for your practice although they are not mandatory it s suggested to complete the homework to gain a better understanding of the concepts taught in each video in order to with pl sql you can create and run pl sql program units such as procedures functions and packages pl sql program units generally are categorized as anonymous blocks stored functions stored procedures and packages the following can be constructed with the pl sql language anonymous block this oracle database 11g develop pl sql program units course explores pl sql the procedural language extension to sql learn to create modularized applications using pl sql develop execute and manage pl sql stored program units like procedures functions packages and database triggers pl sql program units a pl sql unit is any one of the following pl sql block function package package body procedure trigger type type body each of these units will be discussed in the following chapters pl sql data types in this chapter we will discuss the data types in pl sql oracle 12c introduced code based access control cbac the following roles to be granted directly to definer and invoker

rights program units thereby letting you to guarantee the level of privilege present in the calling user without having to expose additional objects directly to that user

22 i am using oracle 10g and toad 11.5 i am trying to call an api from an anonymous block if i recompile the api after adding dbms_output.put_line and then try to execute the anonymous block it shows error as ora-06508: pl/sql could not find program unit being called

pl/sql program unit stored procedure and function by nikhil ranjan september 26, 2015

4 pl/sql is a procedural programming language supported by oracle database server and it is highly integrated with pre-existing sql constructs

pl/sql program unit can be broadly classified in two categories

1 i am recently facing issue program unit being called when calling another package procedure within our package

whenever we change anything in the child or parent package and execute the parent package it shows the error could not find program unit called when calling the child package

plsqldveloper.plsql package the basic unit in pl/sql is a block

all pl/sql programs are made up of blocks which can be nested within each other

typically each block performs a logical action in the program

a block has the following structure

declare declaration statements

begin executable statements

exceptions exception handling statements

end

sql> begin

2 p 3 dbms_output.put_line('outside p 4 dbms_output.put_line('plsql line'); plsql line

5 dbms_output.put_line('plsql unit'); plsql unit

6 dbms_output.put_line('plsql unit owner'); plsql unit owner

7 dbms_output.put_line('plsql unit type'); plsql unit type

8 end

9
