McGraw-Hill's ACT, 2013 Edition 2016-11-25

the authors have put forth great efforts in gathering present day knowledge about different objects within our solar system and universe this book features the most current information on the subject with information acquired from noted scientists in this area the main objective is to convey the importance of the subject and provide detailed information on the physical makeup of our planetary system and technologies used for research information on educational projects has also been included in the radio astronomy chapters this information is a real plus for students and educators considering a career in planetary science or for increasing their knowledge about our planetary system

Solar Planetary Systems 2014-11-05

get a better understanding of the research process and learn how to appraise and apply your findings to the clinical setting with the study guide for understanding nursing research 6th edition this new edition incorporates an expanded focus on evidence based practice based activities and three published research studies referenced throughout the book this study guide walks you through each chapter in the textbook to reinforce your understanding of important concepts hands on practice with three published studies includes three full text published studies that are referenced throughout the study guide time tested and innovative exercises include brief introductions key terms exercises key ideas exercises making connections exercises exercises in critical appraisal and going beyond exercises to promote in depth learning for a variety of learning styles learning activities for each textbook chapter reinforce key concepts and guide you in application to evidence based clinical practice answer key allows you to check your understanding and learn from mistakes formative assessment new increased emphasis on evidence based practice corresponding to the ebp emphasis in the text to help students who are new to nursing research understand the research process and apply it to evidence based nursing practice new increased high value learning activities have been incorporated throughout the study guide new based activities are now included in each chapter to reinforce using the internet appropriately for scholarly research and evidence based practice new updated full text articles ensure that the examples provided reflect the most current high quality studies that are meaningful today new quick reference printed tabs have been added to differentiate the answer key and each of the book s three published studies appendices four tabs total for improved navigation and usability

Study Guide for Understanding Nursing Research - E-Book 2016-08-31

a cogent engaging history of humanity s most ambitious quest seeking outward for other minds david brin author of existence a fascinating perspective on humankind s obsession for knowing if there is anyone else out there gerrit l verschuur author of the invisible universe the story of radio astronomy squeri has written what will likely be the definitive history of the early days of seti that includes profiles of some of its leading characters ben zuckerman coeditor of extraterrestrials where are they an insightful history that explores the scientific foundations of the modern day search for our place in the cosmos waiting for contact delivers unparalleled access to the inner history of seti and invites us to ride along on the journey to answer one of science s ultimate questions are we alone douglas vakoch president meti international waiting for contact is a balanced account telling the tale of the search for extraterrestrial intelligence without the overpromise usually trumpeted by enthusiastic proponents and the hyperventilation so commonly added by ufo enthusiasts if you are simply interested in the history unvarnished by an agenda you ll enjoy this book don lincoln author of alien universe extraterrestrial life in our minds and in the cosmos imagine a network of extraterrestrials in radio contact with each other across the universe superior beings who hail from advanced

civilizations quadrillions of miles away just waiting for earth to tune in some people believe it's only a matter of time before we discover the right station waiting for contact tells the story of the search for extraterrestrial intelligence seti movement which emerged in 1959 as astronomers began using radio telescopes to listen for messages from space new technological developments turned what once was speculation into science boosted by support from frank drake philip morrison carl sagan and the genre of science fiction the seti movement gained followers and continues to capture imaginations today in this one of a kind history lawrence squeri looks at the people reasons goals and mindsets behind seti he shows how it started as an expression of the times a way out of cold war angst with hope for a better world seti's early advocates thought that with guidance from technically and ethically advanced outsiders humanity might learn how to avoid horrors like nuclear annihilation and societal collapse from overpopulation some hoped that good news from outer space might reveal a cure for cancer or even the secret of immortality squeri also describes the challenges seti has faced over the years the struggle to be taken seriously by the scientific community and by nasa competition for access to radio telescopes perpetual lack of funding and opposition from influential politicians he covers the rise and fall of soviet seti and the few rare meetings between soviet and american astronomers despite many setbacks the movement pressed forward with the aid of private donations and developed outreach programs volunteers can now help search for new civilizations on their personal computers by joining the seti home project today seti researchers continue to see themselves as explorers they often identify with columbus and just as columbus never realized the full implications of his discovery we cannot predict what will happen if contact is made this book points out that if against all expectations the embattled seti movement finally succeeds the long awaited first signal picked up by its radio antennas will usher the greatest shift in human history a new adventure will begin lawrence squeri is professor emeritus of history at east stroudsburg university
