american leadership in the world is built on the foundation of its economic strength yet the united states faces enormous economic competition abroad and threats to its economy at home in how america stacks up economic competitiveness and u s policy edward alden bernard l schwartz senior fellow at the council on foreign relations and director of the renewing america initiative and rebecca strauss associate director of renewing america focus on those areas of economic policy that are the most important for reinforcing america s competitive strengths covering education transportation trade and investment corporate tax worker retraining regulation debt and deficits and innovation how america stacks up shows how in a highly competitive global economy these seemingly domestic issues are all crucial to u s success in the global economy the line between domestic economic policy and foreign economic policy is now almost invisible and getting these policies right matters for more than just u s living standards the united states ability to influence world events rests on a robust competitive economy but without further investment in education infrastructure and innovation alden and strauss show the united states runs the risk of endangering its greatest competitive advantage through insightful analysis and engaging graphics how america stacks up outlines the challenges faced by the united states and prescribes solutions that will ensure a healthy competitive u s economy for years to come

How America Stacks Up 2016-02-01

debt markets and investments provides an overview of the dynamic world of markets products valuation and analysis of fixed income and related securities experts in the field practitioners and academics offer both diverse and in depth insights into basic concepts and their application to increasingly intricate and real world situations this volume spans the entire spectrum from theoretical to practical while attempting to offer a useful balance of detailed and user friendly coverage the volume begins with the basics of debt markets and investments including basic bond terminology and market sectors among the topics covered are the relationship between fixed income and other asset classes as well as the differences in fundamental risk particular emphasis is given to interest rate risk as well as credit risks as well as those associated with inflation liquidity reinvestment and esg authors then turn to market sectors including government debt municipal bonds the markets for corporate bonds and developments in securitized debt markets along with derivatives and private debt markets the third section focuses on models of yield curves interest rates and swaps including opportunities for arbitrage the next two sections focus on bond and securitized products from sovereign debt and mutual funds focused on bonds to how securitization has increased liquidity through such innovations as mortgaged and asset backed securities as well as collateralized debt bond and loan obligations authors next discuss various methods of valuation of bonds and securities including the use of options and derivatives the volume concludes with discussions of how debt can play a role in financial strategies and portfolio creation readers interested in a broad survey will benefit as will those looking for more in depth presentations of specific areas within this field of study in summary the book provides a fresh look at this intriguing and dynamic but often complex subject

Debt Markets and Investments 2019-08-08

this report provides an assessment of how governments can generate inclusive economic growth in the short term while making progress towards climate goals to secure

sustainable long term growth it describes the development pathways required to meet the paris agreement objectives

Investing in Climate, Investing in Growth 2017-05-23

exploring the relationship and interaction between economic interests and normative non trade values this book argues that the emergence and development of non trade values is based on a complex dialectic interaction between selfish economic interests and normative values and examines how their structural interdependence has given rise to a remarkable evolution in international trade conceiving this relationship as an intricate dialectic one that is neither purely value driven nor purely economic interest driven it addresses the emergence function and role of non trade values in international trade with a synthesizing approach and explores the results of their interaction in international economic intercourse approaching the non trade issues of trade in a holistic manner the book demonstrates that trade can operate smoothly only if it is framed by an architecture of normative value standards and international trade liberalization has reached the level where further development calls for cooperation also in fields that at first glance may appear to be non trade in nature
