regulating the use of force as moulded by the united nations charter and state practice in this regard it discusses specific issues such as the use of force by way of self defence armed reprisals forcible reactions to terrorism the use of force in the cyberspace humanitarian intervention and the responsibility to protect this collection of previously published classic research articles is of interest to scholars and students of international law and international relations as well as practitioners in international law rooted in critical historical documents from the tudors to the american revolution this rich history the first of two volumes provides a cogent understanding of how the current historical moment has developed as well as of the potential paths that lie ahead international

criminal law is at a crucial point in its history and development and the time is right for practitioners academics and students to take stock of the lessons learnt from the past fifteen years as the international community moves towards an increasingly uniform international criminal legal order with the international criminal court icc at the helm this unique research companion takes a critical approach to a wide variety of theoretical practical legal and policy issues surrounding and underpinning the operation of international criminal law as applied by international criminal tribunals the book is divided into four main parts the first part analyses international crimes and modes of liability with a view to identifying areas which have been inconsistently or misguidedly interpreted overlooked to date or are likely to be increasingly significant in future the second part examines international criminal processes and procedures and here the authors discuss issues such as victim participation and the rights of the accused the third part is a discussion of complementarity and sentencing while the final part of the book looks at international criminal justice in context the authors raise issues which are likely to provide the most significant challenges and most promising opportunities for the continuing development of this body of law as international criminal law becomes more established as a distinct discipline it becomes imperative for international criminal scholarship to provide a degree of critical analysis both of individual legal issues and of the international criminal project as a whole this book represents an important collective effort to introduce an element of legal realism or critical legal studies into the academic discourse this book explores the question of how the multiplication of judicial decisions on international law has influenced the way in which legal findings in international law adjudication are justified international law practitioners frequently cite judicial decisions to persuade courts interpreting international law are no exception to this practice however judicial decisions do much more than persuading they enable and constrain interpretive discretion instead of taking the road of the sources of international law this book turns to the somewhat uncharted terrain of legal argumentation using international criminal law as a case study it shows how the growing number of judicial decisions has normalised courts resort to them in legal justification and enabled some argumentative practices to become constitutive of international law in so doing it critically revisits the implications of an iterative use of judicial decisions and reassesses the influence of the judicialisation turn on the ways in which the meaning of international law is formed shaped and reshaped by reference to judicial decisions key resolutions from the first fifty years of the united nations general assembly in memory of professor thomas m franck papers originally presented in a conference held at the catholic university milan on 10 11 may 2002 ~~the book is a critical and comparative examination of the manner and form in which international economic organizations ieos participate in two main stages of the international legal process law making and law implementation the book is based on normative instruments and fragments of practice of about fifty ieos in order to ensure a proper and timely realization of their normative acts ieos exercise a number of law implementing functions which are subject to a thorough comparative examination the author concludes that existing ieos not being ideal institutional models possess a sufficient arsenal of law implementing instruments to make a considerable impact on the international legal regulations in the economic field the book will be of interest to academics and economic political scientists this book critically and comparatively examines the responses of the united nations and a range of countries to the terror attacks on september 11 2001 it assesses the convergence between the responses of western democracies including the united states the united kingdom australia and canada with countries with more experience with terrorism including egypt syria israel singapore and indonesia a number of common themes the use of criminal law and immigration law the regulation of speech associated with terrorism the review of the state s whole of government counter terrorism activities and the development of national security policies are discussed the book provides a critical take on how the united nations promoted terrorism financing laws and listing processes and the regulation of speech associated with terrorism but failed to agree on a definition of terrorism or the importance of respecting human rights while combating terrorism over the past thirty years there has been a dramatic shift in the way the legal system approaches and resolves family disputes traditionally family law dispute resolution was based on an adversary system two parties and their advocates stood before a judge who determined which party was at fault in a divorce and who would be awarded the rights in a custody dispute now many family courts are opting for a problem solving model in which courts attempt to resolve both legal and non legal issues at the same time american families have changed dramatically divorce rates have leveled off and begun to drop while the number of children born and raised outside of marriage has increased sharply fathers are more likely to seek an active role in their children s lives while this enhanced paternal involvement benefits children it also increases the likelihood of disputes between parents as a result the families who seek legal dispute resolution have become more diverse and their legal situations more complex in divorced from reality jane c murphy and jana b singer argue that the current problem solving model fails to address the realities of today s families the authors suggest that while today s dispute resolution regime may represent an improvement over its more adversary predecessor it is built largely around the model of a divorcing nuclear family with lawyers representing all parties a model that fits poorly with the realities of today s disputing families to~~ case studies to demonstrate that the processes used for resolving disputes have a cultural origin and impact ranging from the dispute resolution practices of the azande a technologically simple small scale african society to the rise of discretionary authority in civil litigation in america chase challenges the claims of some scholars that official dispute systems are more reflective of the
