The Penguin Book of International Short Stories 1989 this book provides an analytical model for reading a large body of modernist works by women the authors document the publication and reception history of e h young s novels make a significant contribution to the field of homeculture and show that the fictional embodiment of home in young virginia woolf elizabeth bowen ivy compton burnett lettice cooper e m delafield stella gibbons storm jameson and e arnot robertson epitomizes the symbiosis between architecture and literature or between the house and the novel

Domestic Modernism, the Interwar Novel, and E.H. Young 2006 in 1965 the second vatican council formally issued a historic document titled *nostra aetate* in our time it was an attempt to frame the relationship between the roman catholic church and the jewish people never before had an ecumenical council attempted such a task the landmark document issued by the council and proclaimed by pope paul vi precipitated a copernican revolution in catholic jewish relations and started a process that has spread to the protestant and orthodox worlds as well this volume consisting of essays and reflections by catholic protestant orthodox and jewish scholars and theologians by pastors and professors from the united states canada ireland great britain and israel is an evaluation of

what nostra aetate has accomplished thus far and how christian jewish relations must proceed in building bridges of respect understanding and trust between the faith groups a jubilee for all times serves as a source of discussion learning and dialogue for scholars students and intelligent laypersons who believe that we must create a positive relationship between judaism and christianity

A Jubilee for All Time 2014-11-18 extremely well researched and unique in its approach citing nine individual confederate soldiers and the impact of the civil war on their christianity these case studies largely drawn from their own words in letters and diaries give a personal and individual perspective that has largely been overlooked in other similar works

The History of Enfield, Connecticut ... 1900 evelyn juers

extraordinary book is a unique imagining of the unconventional love affair between the writer and political activist heinrich mann and nelly kroeger a tall blonde ex barmaid twenty seven years his junior recounting their flight from nazi germany in 1933 to france and then to los angeles in house of exile their story is intricately interwoven with others from their circle of friends relatives and literary contemporaries thomas mann bertolt brecht james joyce franz kafka and virginia woolf among others it gives us a poignant glimpse of a generation of remarkable writers who were determined to carry on living reading and working in wartime in ship s cabins train compartments and shabby rented rooms even though it seemed the civilized world was coming to an end this is a unique portrayal of the strange dislocated existence of the émigré and how lives are connected and defined by writing evelyn juers enlarges the boundaries of biography to provide an intimate sensitively imagined view of an extraordinary time in history

South Atlantic Review 1991 a fascinating account of how the united states established the first global satellite communications system to project geopolitical leadership during the cold war on july

20 1969 the world watched spellbound as nasa astronaut neil armstrong stepped off the apollo 11 lunar module to walk on the moon nasa estimated that 20 percent of the planet s population nearly 650 million people watched the moon landing footage which was made possible by the first global satellite communications system the international telecommunications satellite organization or intelsat in beyond sputnik and the space race hugh r slotten analyzes the efforts of us officials especially during the kennedy administration to establish this satellite communication system and open it to all countries of the world locked in competition with the soviet union for both military superiority and international prestige president john f kennedy overturned the eisenhower administration s policy of treating satellite communications as simply an extension of traditionally regulated telecommunications instead of allowing private communications companies to set up separate systems that would likely primarily serve major developed regions the new administration decided to take the lead in establishing a single world system explaining how the east west cold war conflict became increasingly influenced by north south tensions during this period slotten highlights the growing importance of non aligned countries in asia latin america and africa he also underscores the

importance of a political economy of total cold war in which many crucial aspects of us society became tied to imperatives of national security and geopolitical prestige drawing on detailed archival records to examine the full range of decisionmakers involved in the intelsat system beyond sputnik and the space race spotlights mid and lower level agency staff usually ignored by historians one of the few works to analyze the establishment of a major global infrastructure project this book provides an outstanding analytical overview of the history of global electronic communications from the mid nineteenth century to the present

EPA 530/SW. 1991-06 mihai spariosu here explores the significance of the closely linked concepts of play and aestheticism in philosophical and scientific discourse since the end of the eighteenth century spariosu points out that since its birth in archaic and classical hellenic thought the concept of play has always been subject to the influences of various rational and prerational sets of values spariosu maintains that there have been not one but two major modern concepts of aestheticism artistic aestheticism related to a prerational mentality and introduced in modern thought by schopenhauer and nietzsche and philosophicalscientific aestheticism initiated by kant and schiller and shaped by

rationalism according to Spariosu the first has often arisen in response to the attempts of philosophy and science to impose their standards on art and the second has often been called on to deal with the epistemological crises that periodically shake these disciplines Spariosu also looks closely at some of the play concepts that surface in modern science in connection with the Darwinian theory of evolution and the play of scientific discourse itself as exemplified by the new physics and the contemporary philosophy of science a penetrating and cogently argued book Dionysus Reborn will be welcomed by readers interested in continental philosophy scientific discourse and the aesthetics of play including literary theorists comparatists philosophers intellectual historians and social scientists

National Library of Medicine Current Catalog 1985-02-11 a new and provocative take on the formerly classified history of accelerating superpower military competition in space in the late cold war and beyond in March 1983 President Ronald Reagan shocked the world when he established the Strategic Defense Initiative (SDI) derisively known as Star Wars a space based missile defense program that aimed to protect the US from nuclear attack in weapons in space Aaron Bateman draws from recently

declassified american european and soviet documents to give an insightful account of sdi situating it within a new phase in the militarization of space after the superpower détente fell apart in the 1970s in doing so bateman reveals the largely secret role of military space technologies in late cold war us defense strategy and foreign relations in contrast to existing narratives weapons in space shows how tension over the role of military space technologies in american statecraft was a central source of sdi s controversy even more so than questions of technical feasibility by detailing the participation of western european countries in sdi research and development bateman reframes space militarization in the 1970s and 1980s as an international phenomenon he further reveals that even though sdi did not come to fruition it obstructed diplomatic efforts to create new arms control limits in space consequently weapons in space carries the legacy of sdi into the post cold war era and shows how this controversial program continues to shape the global discourse about instability in space and the growing anxieties about a twenty first century space arms race
