Sociology and Human Ecology

2013-07-20

traditionally sociology has identified its subject matter as a distinct set social phenomena that can be taken as quite different and largely disconnected from potentially relevant disciplines such as psychology economics or planetary ecology within sociology and human ecology smith and jenks argue that this position is no longer sustainable indeed exhorting the reader to confront human ecology and its relation to the physical and biological environments smith and jenks suggest that the development of understanding with regards to the position occupied by the social requires in turn an extension of the component disciplines and methodologies of a new human socio ecology aiming to evoke critical change to the possibility status and range of the social sciences whilst also offering essential grounding for inter disciplinary engagement sociology and human ecology will appeal to postgraduate students and postdoctoral researchers interested in fields such as social theory socio biology and ecological economics

Mathematics and Information in the Philosophy of Michel Serres

2013-09-16

this book introduces the reader to serres unique manner of doing philosophy that can be traced throughout his entire oeuvre namely as a novel manner of bearing witness it explores how serres takes note of a range of epistemologically unsettling situations which he understands as arising from the short circuit of a proprietary notion of capital with a praxis of science that commits itself

concept as a cultural aspiration driver of policy and lived personal experience has become part and parcel of our individual sense of self and our collective national identity while the rhetoric of redemption is familiar and ubiquitous newman uncovers the costs and constraints of second chances paying particular attention to the factors that affect judgments of deservedness informed by an array of data sources including personal interviews mission statements of nonprofit recovery agencies images in popular culture stories from the news plot summaries of novels and scriptural texts newman frames the second chance experience as the quintessential cultural paradox a concept that simultaneously represents the pinnacle of our shared hopes for renewal and our deepest suspicions about the intransigence of human nature

Republic, Lost

2023-09-05

harvard law school professor lawrence lessig investigates the most vexing problem in american democracy how money corrupts our nation s politics and the critical campaign to stop it in an era when special interests funnel huge amounts of money into our government driven by shifts in campaign finance rules and brought to new levels by the supreme court in citizens united v federal election commission trust in our government has reached an all time low more than ever before americans believe that money buys results in congress and that business interests wield control over our legislature with heartfelt urgency and a keen desire for righting wrongs harvard law professor lawrence lessig takes a clear eyed look at how we arrived at this crisis how fundamentally good people with good intentions have allowed our democracy to be co opted by outside interests and how this exploitation has become entrenched in the system rejecting simple labels and reductive logic and instead using examples that resonate as powerfully on the right as on the left lessig seeks out the root causes of our situation he plumbs the issues of campaign financing and corporate lobbying revealing the human faces and follies that have allowed corruption to take such a foothold in our system he puts the issues in terms that nonwoks can understand using real world analogies and real human stories and ultimately

the zero marginal cost society internet of things collaborative commons and eclipse capitalism jeremy rifkin (PDF)

he calls for widespread mobilization and a new constitutional convention presenting achievable solutions for regaining control of our corrupted but redeemable representational system in this way lessig plots a roadmap for returning our republic to its intended greatness while america may be divided lessig vividly champions the idea that we can succeed if we accept that corruption is our common enemy and that we must find a way to fight against it in republic lost he not only makes this need palpable and clear he gives us the practical and intellectual tools to do something about it

democracy reflecting on president jair bolsonaro s misgovernment of brazil as evidenced by his political actions speeches and omissions from march 2020 to september 2021 and using concepts like biopolitics neoliberalism and necropolitics duarte proposes three interrelated hypotheses to demonstrate bolsonaro s sharp distrust of democracy first that bolsonaro s rhetoric actions and omissions during the first year and a half of the pandemic revealed a dangerous mixture of biopolitical neoliberal and necropolitical governmentality strategies second that the pandemic in brazil intensified the damaging side effects against democracy brought by neoliberalism and biopolitics once the necropolitical vector assumed precedence and third that bolsonaro s political agenda is either to revoke the brazilian democracy by violent means or to implement a façade democracy by slowly distorting it from within blurring the differences between democracy and authoritarianism conceptualizing democracy as power of the demos and not exclusively as a political regime organized around a definite set of political institutions duarte argues that bolsonaro s misgovernment of brazil is related to his antidemocratic viewpoints pandemic and crisis of democracy is an important book for researchers students and anyone concerned about the dangers that surround the democratic experience in the contemporary world

The Real Jouissance of Uncountable Numbers

2016-09-13

lacan critiqued imaginary intuition for confusing direct perception with unconscious pre conceptions about people and the world the emphasis on description goes hand in hand with a rejection of theory and the science of the unconscious and a belief in the naive self transparency of the world at the same time knowing in and of the real requires a place beyond thinking multi valued forms of logic mathematical equations and different conceptions of causality acausality and chance this book explores some of the mathematical problems raised by lacan s use of numbers and the interconnection between mathematics and psychoanalytic ideas within any system mathematical or otherwise there are holes or acausal cores and remainders of indecidability it is this senseless point of non knowledge that makes change and the emergence of the new possible within a system this book differentiates between two types of void and aligns them with the lacanian concepts of a true and a false hole and the psychoanalytic theory of primary repression

The BBC

2016-10-01

the bbc the mouthpiece of the establishment the bbc is one of the most important institutions in britain it is also one of the most misunderstood despite its claim to be independent and impartial and the constant accusations of a liberal bias the bbc has always sided with the elite as tom mills demonstrates we are only getting the news that the establishment wants aired in public throughout its existence the bbc has been in thrall to those in power this was true in 1926 when it stood against the workers

during the general strike and since then the corporation has continued to mute the voices of those who oppose the status quo miners in 1984 anti war protesters in 2003 those who offer alternatives to austerity economics since 2008 from the outset much of its activity has been scrutinised by the secret services at the invitation of those in charge since the 1990s the bbc has been integrated into the market while its independence from government and big business has been steadily eroded the bbc is an important and timely examination of a crucial public institution that is constantly under threat
