questions in the beginning sammael went to the holy city of ermon hill to protest the actions of god to the holy council made up of the most powerful angels in heaven sammeal quickly builds an army of one third of the angels in heaven to rise up and fight against god the archangels michael and gabriel led heaven to victory and those who fought against god in the uprising were cast out of heaven to earth on the opposite side of the veil of the senses to await judgement day now the final days of earth are approaching as both heaven and hell prepare for one last battle god sends auron to tell jack watts he is to lead the armies of heaven against the forces of sammael as the world is consumed by war jack makes the decisions which will ultimately help shape the fate of humanity everyone involved quickly finds out that the line between good and evil is not as clear cut as they were lead to believe this book is based on war gain or loss before military action and even before mobilization the decision on whether to go to war is debated by politicians pundits and the public as they address the right or wrong of such action it is also a time when in the language of the just war tradition the wise would deeply investigate their true claim to jus ad bellum the right of war wars have negative consequences not the least impinging on human life and offer infrequent and uncertain benefits yet war is part of the human condition james g murphy s insightful analysis of the jus ad bellum criteria competent authority just cause right intention probability of success last resort and proportionality is grounded in a variety of contemporary examples from world war i through vietnam the soccer war between honduras and el salvador afghanistan and the middle east conflict murphy argues persuasively that understanding jus ad bellum requires a primary focus on the international common good and the good of peace only secondarily should the argument about going to war hinge on the right of self defense in fact pursuing the common good requires political action given that peace is not simply the absence of violence he moves on to demonstrate the interconnectedness of the jus ad bellum criteria contending that some criteria depend logically on others and that competent authority not just cause is ultimately the most significant criterion in an analysis of going to war this national identity for granted in recent decades that assumption has been challenged individual and group rights have expanded eliciting acerbic debate about the legitimacy and limits of claims national political leaders have preferred to finesse rather engage these controversies at the same time large numbers of new immigrants have dramatically made the united states more racially ethnically and culturally diverse as a result this country faces critical political and cultural questions what does it mean to be an american what if anything binds our country and citizens together is a new american identity developing and if so what is it can political leaders help us answer these questions for the second time in the history of the united states another civil war looms tthe new danger lies in conflicts among people of different racial cultural and ethnic heritages and between those who view themselves as culturally politically and economically disadvantaged versus those whom they see as privileged unlike the first civil war the antagonists cannot take refuge in their family or their religious social cultural or political organizations these are the precisely the places were the war is being fought at issue is whether it is possible or desirable to preserve the strengths of a common heritage some quarters insist that our past has resulted in a culture only worth tearing down to build over rather than one worth keeping and building upon we are in conflict over the viability of american culture and identity itself this volume is organized into a series of morality sexuality judaism the eternal struggle of head and heart woody will be the definitive word on a major american talent as he begins his ninth decade and his sixth decade of making movies although the civil war and the great war were fought only fifty years apart the perceived time between these two cataclysmic events seems far longer in popular american memory the civil war was the centerpiece of the nineteenth century and lies deep in america s past whereas world war i was a modern prelude to world war ii a conflict still in living memory wars civil and great breaks down these barriers of time and memory and shows how close and how similar these two conflicts really were in the american experience setting both wars in the long nineteenth century the authors of this volume reveal how the civil war cast its long shadow over the events of the great war president wilson looked to lincoln during the great war for guidance on national leadership at wartime general john j pershing remembered the civil war of his childhood and sought to learn lessons from grant and mcclellan and the doughboys on european battlefields held firm to the culture of honor and duty that had inspired their forefathers to take up arms in this volume every author as an expert in their own field addresses four overarching questions what legacy did the civil war leave did the great war generation interpret the lessons of the civil war and if so how how did the great war change the lessons from the civil war era and finally how did both wars contribute to the modernization of the united states wars civil and great highlights the striking similarities between the two wars by analyzing how the civil war affected the american reaction to and experience in the great war while attending to enlisted men military officers and political leaders other chapters address the environmental effects of both wars the wars impacts on medicine and mental trauma and the experiences of black american soldiers in both wars as they fought for a country that treated them so terribly this volume while at first appearing as a disparate pairing of conflicts deftly opens a new window into the past and establishes an illuminating paradigm in the two wars of the long nineteenth century life magazine is the treasured photographic magazine that chronicled the 20th century it now lives on shards fragments of mind presents a collection of aphorisms epigrams terse journal entries notes short vignettes and pity statements as well as longer segments such as unpublished papers blog posts and essays meant to enlighten the reader and inspire the ability to think none of these minutes are meant to be exhaustive although no

linear organization enforces itself on the text comprehensive themes will be discovered through comparable reading each entry stands alone and is presented in no particular order i cover topics as varied as extra terrestrials and christianity cell phones and just war criteria the reader may start at any point from beginning to end or randomly and various and sundry topics will begin to take shape in a comprehensive whole the numbering system in this book is an attempt to impose some logical order and easy reference on an otherwise fragmented text however this is not unlike the way students learn through the online medium when looking up relevant subjects in short informational bursts proceeding in rapid fire succession i take as my literary examples the writing of pascal in pensées and nietzsche s twilight of the idols although i don t pretend to be as sublime as they were i do use their format as a template for this book
