A Season to Celebrate 2018-10-30 in the fiscal year ended june 30 1917 the foreign trade of the united states in raw and manufactured furs reached nearly if not fully the high level of years preceding the war the imports were valued at 21 553 375 while the exports amounted to 15 729 160 a sum exceeded in only one previous year 1913 when they were 28 389 586 home manufacture and utilization of american furs has grown enormously since the beginning of the war the large export trade of the past year shows therefore a production of pelts of unprecedented value in spite of the fact that the actual number of skins collected must have been less than in previous years many former trappers were more profitably employed in other industries and

many were deterred from plying their vocation by the increased restrictions on trapping especially the costly nonresident licenses trapping restrictions properly enforced and limiting the taking of fur to prescribed seasons will result not only in conserving the fur supply but in greatly increasing the quality and value of the annual catch p 2
