case i 1955 allahabad university gayatri then an msc student recalls an incident with fondness even today the science department was quite close to the english department she remembers this professor of the english department as well mannered to a fault dapper and endowed with a distinctive aura almost reel like driving his car with one hand on the wheel and the other negotiating a cigarette

101 POSITIVE THOUGHTS

2020-01-01

authored by an astronomy and space engineer this book the first of its kind explores in details the various prospects for an indian student to pursue astronomy as a career it is like a single shelter where any interested student will find ample information and suitable guidance to pursue astronomy as a career it will also help especially indian parents and faculties of various institutes to guide prospective students for opting a career in astronomy written in lucid style the book is a valuable asset for any interested student having a dream of becoming an astronomer

Conference Proceedings. New Perspectives in Science Education

2017

this book constitutes a sociological anthropological and curricular inquiry into the factors surrounding high academic achievement rates of students in south korea taking root in similar studies conducted around the exemplary nature of the finnish education model it explores the phenomenon of success in south korea uniquely connecting it to the scholarship and models for examining the recent shift in attention and popularity of korean culture the authors argue that korean education or k edu can also be studied and understood as a hallyu and an exemplary form of education drawing on longitudinal qualitative studies spanning over 15 years the authors advance understandings of korean academic success beyond more generalized understandings of how asian students learn and towards a holistic explanation for the case of korea as such the book challenges the perception of korean students as passive learners with a controlled learning culture and instead advocates the ways in which korean students are leading a changing culture by utilizing all available resources and opportunities in the space of south korea s evolving ecological system of education in addition this book provides one explanation as to how students from east asian countries achieve such excellent academic performance a crucial exploration of the culture and growth of education systems in asian countries this book will appeal to scholars and

researchers with interests in korean education and korean students academic achievement as an emerging inquiry for both korean studies and east asian cultural studies in addition this book will also be informative for scholars of comparative education sociology of education educational policy and postcolonial educational research in the world

Becoming an Astronomer

2017-01-01

this book brings researchers from across the world to share their expertise experience research and reflections on science education in india to make the trends and innovations visible the thematic parts of the book discuss science education overviews across k 16 levels inclusivity and access for underrepresented and marginalized sections use of innovations including technology in the teaching and implications for research practice innovation and creativity the book should be of special interest to researchers school administrators curriculum designers and policymakers a timely compilation for current and future generations of academic researchers teachers and policymakers who are interested in examining the issues facing one of the largest education systems in the world the book offers unique insights into contemporary topics such as girls in stem subjects curriculum reform and developing a generation of future creative thinkers professor vaille dawson the university of western australia australia it provides a panorama of challenges in a country of more than 1 3 billion people 50 being below the age of 25 years the book arrives at a time in which there are discouraging trends including a decrease in funding for education the book chapters are centred on issues that warrant debate to foster awareness of the roles of science education in india and priorities and possibilities for expanding horizons on the road ahead professor kenneth tobin the city university of new york new york usa

2024-03-21

this book examines the ways in which attitudes toward astronomy in australia china india indonesia japan south korea new zealand taiwan thailand and uzbekistan have changed with the times the emergence of astrophysics was a worldwide phenomenon during the late nineteenth and early twentieth centuries and it gradually replaced the older style positional astronomy which focused on locating and measuring the movements of the planets stars etc here you will find national

overviews that are at times followed by case studies of individual notable achievements although the emphasis is on the developments that occurred around 1900 later pioneering efforts in australian chinese indian and japanese radio astronomy are also included as the first book ever published on the early development of astrophysics in asia the authors fill a chronological and technological void though others have already written about earlier astronomical developments in asia and about the recent history of astronomy in various asian nations no one has examined the emergence of astrophysics the so called new astronomy in asia during the late nineteenth and early twentieth centuries

come to be regarded as a key national programme in many countries and gifted education in science disciplines is now of major importance to economic and technological development despite these national initiatives and developments there are very few discussions on gifted education in science from international perspectives this will be a valued addition to the scholarship in this emergent field

New Trends in Astronomy Teaching

2004

conducting research requires resources to meet the research need the resources in the research institutes centers are often inadequate limiting the research outcome research grants help overcome those limitations and help the researchers carry out quality research without any restriction grant proposal writing is an essential skill to be mastered by every researcher however the majority of the medical schools except the few research institutes do not have a structured learning module for obtaining grants on most occasions the skill of writing grant proposals goes by self learning for students it is burdening due to the tremendous time consumed to learn the craft of writing the grant proposal and the exhausting clinical and academic work this book is carefully prepared to keep in mind the difficulties faced by the young researchers and the students concerning choosing a funding agency grant makers expectations budgeting surveillance and site visits rights of the researcher and the funding agency and ethical and legal aspects of obtaining the grant the book also covers the alternate plan for partial funding or interruption of the financing reporting the source of funding and acknowledgment good clinical practice guidelines and dealing with the rejected grant proposal the research projects are often dropped or modified extensively due to the limited resources in the existing facility the researchers are forced to compromise the research objective due to expensive requirements there is a shortage of awareness regarding the availability of funding and grant for the conduct of research even if the researchers are aware of obtaining the financing there is a lack of training in grant proposal writing which is essential in getting the research funding this book on grant proposal writing for medical and healthcare professionals covers such difficulties and deficiencies it will provide complete companionship from knowing the funding agency to obtaining the grant
