now updated and expanded estimating in building
construction eighth edition brings together everything
needed for a complete modern course in estimating
building on well proven previous editions it combines
sound coverage of principles with step by step
procedures to help students learn concepts more
easily ideal for construction architecture and
engineering students it reflects the popular approach
of tracking a complete project s progress there are
examples of estimating portions of the building that
many general contractors perform and thorough
coverage of the use of specialty subcontractors this
edition adds a new discussion of building information
modeling bim and more detailed discussions of
estimating equipment cost electrical plumbing
including fire sprinklers and hvac for convenience and
cost savings workbook problems that accompanied the
previous edition have been incorporated into the book
