aproximadamente 30 anos mais de 1 milhão de estudantes utilizaram o livro
microbiologia em faculdades e universidades em todo o mundo tornando o um
clássico na área esta nova edição mantém as características que tornaram este
livro tão bem sucedido as quais são empregadas para abordar de forma mais
didática as novidades deste campo em constante mudança we belong to an era of
non communicable diseases such as cancer hypertension diabetes mellitus stroke
obesity cardiovascular disorders etc about two decades ago the advent of these
so called lifestyle disorders were seen only in a handful of population but as
time passes we witness more and more people suffering from such problems from a
homoeopathic standpoint we view this situation to be alarming this is because
all the above mentioned diseases indicate a latent chronic process undergoing
within the human body which have a potential to undermine every possibility of
an individual to lead a healthy life the purpose of our book is to demonstrate
the efficacy of homoeopathy as probably the only curative and scientific
healing science which can free people from the crutches of chronic disease in a
very simple and non invasive manner aude sapere dare to be wise a phenomenal
journey of unveiling the scientificity of homoeopathy that has been
mysteriously masked since time immemorial this book unfolds the latest
astonishing evidence based discovery as to how foreign exogenous proteins are
capable of disrupting the homeostasis of our body and predisposing it to
chronic diseases or chronicity dr hahnemann has strongly asserted that treat
the person as one whole and not his individual parts which holds true because
when a person falls ill it s the interior that gets disturbed first this
disturbance not only disseminates to the functional unit of the body i e the
cells but also pervades the proteins which form a major constituent of our body
dr rajan dubey renowned for his scientific and evidence based writing has
described the intricate process by which protein disturbance occurs and
chronicity commences in our body he also accentuates the role of external
influences like emotions diet and environment in governing our dna and genes
whereby exciting and maintaining the disease process to substantiate the
scientificity of the theory of chronic diseases proposed by dr samuel hahnemann
and also to facilitate its easy and practical utility even in today s era we
took up a retrospective study of a random sample of 30 patients from a pool of
around 10 000 patients visiting medigene homoeocare our clinical institute
located in mumbai the purpose of the study was to trace down the precursor
leading to chronicity in each patient amongst these 10 cases are explained in
complete detail to serve as a practical guide to the readers an insight into
the remedies holding close proximity to the case and the differentiation
between them has been imparted as well this is the definitive resource for
individuals preparing for the aea aquatic fitness professional certification
exam and for anyone leading water exercise classes the work of a sports
therapist is highly technical and requires a confident responsible and
