this book is about the development of one institution and its developmental work in education in south and central asia and in east africa the institute for educational development ied at the aga khan university aku in karachi pakistan the ied came into being in 1993 and launched its first programme in 1994 an m ed in teacher education it recruited 20 teachers carefully selected from schools in pakistan east africa tajikistan and bangladesh there should have been a teacher from india but sadly she was not granted a visa to come these 20 teachers graduating from the m ed course 18 months later were the first graduates from the ied they became the first professional development teachers pdts working with schools and running short courses for other teachers at the ied after three years of pdt work some of these graduates were selected for ph d studies overseas and are now doctoral graduates and central ied faculty the wheel has come full circle in the meantime the m ed programme has flourished and developed with eight cohorts of selected teachers the ied programmes have expanded in a variety of ways and in a variety of

directions some are academic programmes educating teachers and educational managers in a university environment albeit with school focused work some are professional programmes located in the field albeit with theoretical elements perceived as central to the developmental process the ied has attracted attention both nationally and internationally in the countries listed above professional programmes have developed to run alongside the central ied operation the ied s work has become visible to government agencies who from tentative initial investment are now looking towards the ied to work with them in the developmental field other countries have seen the results of the ied s work in the original countries and have asked to join the developmental enterprise the ied now works with three countries in east africa namely kenya tanzania and uganda in afghanistan syria and several central asian countries including tajikistan and kyrgyzstan there are possibilities of initiating work in other countries in the region perceived in such terms the ied s growth and influence reads like an educational developmental success story and of course it is a success but this is not to say that there are not many issues and problems to face in its day to day and decade to decade development in 2003 the ied celebrated 10 years of operation this was a time to celebrate and also to take stock of its achievements and issues it has many impact programmes in place seeking to provide sound research evidence to document processes in learning and growth and issues that have to be addressed one problem of rapid growth is that it is easy for the institute and its faculty to become overextended so that in depth review of programmes and outcomes is never achieved despite considerable overextension the ied is striving to avoid this danger this book is a product of the 10 years of development it had been hoped to complete it for the 10 year celebrations but as with other aspects of the ied it kept on growing this volume tries to provide an account of development from a number of perspectives such as historical chronological issues based and honestly critical

at turns poignant funny philosophical and raw but always real the wolves of helmand is both a heartfelt homage to the marine brotherhood with whom biggio served and an expression of respect and love for the people of afghanistan who ultimately trusted shared and appreciated their purpose ten years after serving his country as a u s marine captain frank gus biggio signed up once again because he missed the brotherhood of the military leaving behind his budding law career his young wife and newborn son he was deployed to helmand province the most violent region in war torn afghanistan for reasons few would likely understand before reading this book riven by conflict and occupation for centuries because of its strategic location the region he landed in was at that time a hotbed of taliban insurgency as a participant in the landmark u s led operation khanjar biggio and his fellow marines were executing a new era military strategy focused largely on empowerment of the local population the offensive began with a troop surge designed to thwart the taliban but was more importantly followed by the restoration of the local government and real time capacity building among the withdrawn and destitute afghan people the wolves of helmand is unlike other war memoirs it takes us less into the action though there is that too and more into the quiet places of today s war zones yes you ll read of our marines stealth arrival in a single night our advanced weaponry and our pop up industrial village command centers you ll read as well about the ambushed patrols and the carnage of ieds but you will also read of the persistence humility ruggedness loneliness tedium diplomacy and humanity of our marines jobs there which more than anything else reveals the magnitude of even the smallest victories completed years after the author s return from his mission the wolves of helmand is most of all a decade long self examination of a warrior s heart conscience and memory whether intended or not biggio s deep reflections and innate honesty

answer every question you've ever wanted to ask about life and death in war and even questions you probably never thought to ask what calls a warrior to duty what makes sustains plagues and even breaks a warrior these are bigger questions than the ones impolite society pokes around when a veteran returns home did you kill anyone did you have to go why would you fight for another country why were we even there yet the answers to those queries are here too in this thoughtful memoir that will make you think about war family love and loss
