Corporate Governance of Chinese Multinational Corporations 2020-12-07

this book is the first to explore the issue of corporate governance in china s new corporations with rapid development over the last two decades china has seen compelling achievements in overseas investment specifically an increasing number of chinese companies have been going out to become multinational enterprises from the practical view corporate governance issues have been identified in the literature as one of the most important factors in determining whether these chinese multinational enterprises succeed or not however existing literature provides little investigation and understanding about corporate governance of chinese multinational enterprises this book fills that gap and will be of value to corporate executives scholars of china s economy and journalists

Stocks for All: People's Capitalism in the Twenty-First Century 2021-12-31

public stock markets are too small this book is an effort to rescue public stock markets in the eu and the us there should be more companies with publicly traded shares and more direct share ownership anchored in a broad historical study of the regulation of stock markets and companies in europe and the us the book proposes ways to create a new regulatory regime designed to help firms and facilitate people s capitalism through its comparative and historical study of regulation and legal practices the book helps to understand the evolution of public stock markets from the nineteenth century to the present day the book identifies design principles that reflect prior regulation while continental european company law has produced many enduring design principles the recent regulation of stock markets in the eu and the us has failed to serve the needs of both firms and retail investors the book therefore proposes a new set of design principles to serve contemporary societal needs

Computational Morphologies 2017-10-04

this book represents an invaluable and up to date international exchange of research case studies and best practice to tackle the challenges of digital technology computer aided design 3d modeling prototyping machines and computational design with contributions from leading experts in the field of industrial design and cultural heritage it is split into three parts the first part explores basic rules of design design models and shape grammar including the management of complex forms and proves that innovative concepts may be derived from organic models using generative design the second part then investigates responsive design describing how to manage the changing morphologies of buildings through pre programmed mechanisms of real time response and feedback embedded in inhabitable spaces lastly the third part focuses on digital heritage and its capability to increase the interaction and manipulation of object and concepts ranging from augmented reality to modeling generative tools the book gathers peer reviewed papers presented at the ecaade education and research in computer aided architectural design in europe regional international symposium held in milan italy in 2015

Homo Prospectus 2016-06-07

our species is misnamed though sapiens defines human beings as wise what humans do especially well is to prospect the future we are homo prospectus in this book martin e p seligman peter railton roy f baumeister and chandra sripada argue it is anticipating and evaluating future possibilities for the guidance of thought and action that is the cornerstone of human success much of the history of psychology has been dominated by a framework in which people s behavior is driven by past history memory and present circumstances perception and motivation homo prospectus reassesses this idea pushing focus to the future front and center and opening discussion of a new field of psychology and neuroscience the authors delve into four modes in which prospection operates the implicit mind deliberate thought mind wandering and collective social imagination they then explore prospection s role in some of life s most enduring questions why do people think about the future do we have free will what is the nature of intuition and how might it function in ethics how does emotion function in human psychology is there a common causal process in different psychopathologies does our creativity change with age in this remarkable convergence of research in philosophy

statistics decision theory psychology and neuroscience homo prospectus shows how human prospecting fundamentally reshapes our understanding of key cognitive processes thereby improving individual and social functioning it aims to galvanize interest in this new science from scholars in psychology neuroscience and philosophy as well as an educated public curious about what makes humanity what it is
