**Timecode A User's Guide** 2011-04-11 this book is a collection of extremely well articulated insightful and unique state of the art papers presented at the computing conference which took place in London on June 22-23, 2011. A total of 539 papers were received out of which 193 were selected for presenting after double-blind peer review. The book covers a wide range of scientific topics including IoT, artificial intelligence, computing, data science, networking, data security, and privacy, etc. The conference was successful in reaping the advantages of both online and offline modes. The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. We hope that readers find this book interesting and valuable. We also expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.
