zien hoe hermans poëtica thematiek en techniek wortelen in zijn visie op het bestaan hermans zag de literatuur als het ultieme wapen om zijn persoonlijke waarheid in de geest van zijn onwillige medemensen te branden literatuur is voor hem een bestaansvoorwaarde en bittere noodzaak deze werkelijkheidsconceptie komt tot uitdrukking in zijn thematiek vruchteloos proberen de personages van proposed when we aim to identify people and to reconstruct populations under conditions where information is scarce ambiguous fuzzy and sometimes erroneous the process from handwritten registers to a reconstructed digitized population consists of three major phases reflected in the three main sections of this book the first phase involves transcribing and digitizing the data while structuring the information in a meaningful and efficient way in the second phase records that refer to the same person or group of persons are identified by a process of linkage in the third and final phase the information on an individual is combined into a reconstruction of their life course the studies and examples in this book originate from a range of countries each with its own cultural and administrative characteristics and from medieval charters through historical censuses and vital registration to the modern issue of privacy preservation despite the diverse places and times addressed they all share the study of fundamental issues when it comes to model reasoning for population reconstruction and the possibilities and limitations of information technology to support this process it is thus not a single discipline that is involved in such an endeavor historians social scientists and linguists represent the humanities through their knowledge of the complexity of the past the limitations of sources and the possible interpretations of information the availability of big data from digitized archives and the need for complex analyses to identify individuals calls for the involvement of computer scientists with contributions from all these fields often in direct cooperation this book is at the heart of the digital humanities and will hopefully offer a source of
