In Indonesia schools that combine curricula from both the government and other curricula which are usually from abroad are grouped as SPK (Satuan Pendidikan Kerjasama) cooperative education unit. These schools will have the national exam presented to their students in English for mathematics and science. By far most national exam practice books only provide practices in Bahasa Indonesia. This book is the solution to parents, students, and teachers of SPK searching for a practice book in English to prepare themselves better for the exam. Why is this book better? Aside from the language used, this book pays attention to the correct grammar, a problem that can still be seen in other similar practice books. This will help students to easily understand the lessons. Besides each lesson is explained in detail with examples and practices. This book also provides a pre-test to help students determine their weaknesses and a post-test to check student's understanding and to see how they progress compared to the pre-test.
