## *Control and Resistance*

2020

this highly original book addresses the understudied connection between food and authoritarian control during the franco regime

## **Manual of Forensic Taphonomy**

2021-12-22

the main goals in any forensic skeletal analysis are to answer who is the person represented individualization how that person died trauma pathology and when that person died the postmortem interval or pmi the analyses necessary to generate the biological profile include the determination of human nonhuman or nonosseous origin the minimum number of individuals represented age at death sex stature ancestry perimortem trauma antemortem trauma osseous pathology odontology and taphonomic effects the postmortem modifications to a set of remains the manual of forensic taphonomy second edition covers fundamental principles of these postmortem changes encountered during case analysis taphonomic processes can be highly destructive and subtract information from bones regarding their utility in determining other aspects of the biological profile but they also can add information regarding the entire postmortem history of the remains and the relative timing of these effects the taphonomic analyses outlined provide guidance on how to separate natural agencies from human caused trauma these analyses are also performed in conjunction with the

field processing of recovery scenes and the interpretation of the site formation and their postdepositional history the individual chapters categorize these alterations to skeletal remains illustrate and explain their significance and demonstrate differential diagnosis among them such observations may then be combined into higher order patterns to aid forensic investigators in determining what happened to those remains in the interval from death to analysis including the environments in which the remains were deposited including buried terrestrial surface marine freshwater or cultural contexts features provides nearly 300 full color illustrations of both common and rare taphonomic effects to bones derived from actual forensic cases presents new research including experimentation on recovery rates during surface search timing of marine alterations trophy skulls taphonomic laboratory and field methods laws regarding the relative timing of taphonomic effects reptile taphonomy human decomposition and microscopic alterations by invertebrates to bones explains and illustrates common taphonomic effects and clarifies standard terminology for uniformity and usage within in the field while the book is primarily focused upon large vertebrate and specifically human skeletal remains it effectively synthesizes data from human ethological geological paleontological paleoanthropological archaeological artifactual and zooarchaeological studies since these taphonomic processes affect other vertebrates in similar manners the manual of forensic taphonomy second edition will be invaluable to a broad set of forensic and investigative disciplines

## Oh's Intensive Care Manual E-Book

2013-10-31

whether you re a newcomer to the icu or a seasoned practitioner oh s intensive care manual delivers the practical

expert answers you need to manage the conditions you see every day in the intensive care unit this highly esteemed bestselling medical reference book presents comprehensive detail on each topic while maintaining a succinct accessible style so this information can be seamlessly incorporated into your daily practice consult this title on your favorite e reader conduct rapid searches and adjust font sizes for optimal readability access everything you need to know about disease processes and their management during the course of icu rotations gain valuable insight into the consensus of practice and standard of icu care as followed in the uk europe india and australia take advantage of expert advice on practical issues that will be encountered on a day to day basis in the icu as well as common pitfalls in treatment and management emphasized in each chapter overcome the latest challenges in intensive care medicine ten brand new chapters in this edition include palliative care icu and the elderly health care team in intensive care medicine preparing for examinations in intensive care medicine ultrasound in the icu ecmo for respiratory failure ecmo for cardiac failure cirrhosis and acute on chronic liver disease solid tumours and their implications in the icu and delirium optimize patient outcomes through an even greater focus on clinical management strategies quickly locate essential information with an increased number of summary boxes tables and charts and a new chapter organization that expedites reference

## **Advances in Computer Entertainment**

2013-11-08

this book constitutes the refereed conference proceedings of the 10th international conference on advances in computer entertainment ace 2013 held in boekelo the netherlands in november 2013 the 19 full paper and 16 short

papers presented together 42 extended abstracts were carefully reviewed and selected from a total of 133 submissions in all categories the papers cover topics across a wide spectrum of disciplines including new devices evaluation and user studies games as interface to serious applications creating immersion interfaces new experiences procedural approaches and ai and theory focusing on all areas related to interactive entertainment they aim at stimulating discussion in the development of new and compelling entertainment computing and interactive art concepts and applications

## Mrs. Brown's A to Y of Everything
