globalisation has long historical roots in south asia but economic liberalisation has led to uniquely rapid urban growth in south asia during the past decade this book brings together a multidisciplinary collection of chapters on contemporary and historical themes explaining this recent explosive growth and transformations on going in the cities of this region the essays in this volume attempt to shed light on the historical roots of these cities and the traditions that are increasingly placed under strain by modernity as well as exploring the lived experience of a new generation of city dwellers and their indelible impact on those who live at the city s margins the book discusses that previously cities such as mumbai grew by accumulating a vast hinterland of slum dwellers who depressed wages and supplied cheap labour to the city s industrial economy however it goes on to show that the new growth of cities such as bangalore hyderabad and madras in south india or delhi and calcutta in the north of india is more capital intensive export driven and oriented towards the information technology and service sectors the book explains that these cities have attracted a new elite of young educated workers with money to spend and an outlook on life that is often a complex mix of modern ideas and conservative tradition it goes on to cover topics such as the politics of town planning consumer culture and the

struggles among multiple identities in the city by tracing the genealogies of cities it gives a useful insight into the historical conditioning that determines how cities negotiate new changes and influences there will soon be more mega cities in south asia than anywhere else in the world and this book provides an in depth analysis of this growth it will be of interest to students and scholars of south asian history politics and anthropology as well as those working in the fields of urbanisation and globalisation

a comparative global history of mennonites from the ground up winner of the wallace k ferguson prize by the canadian historical

association nominee of the Margaret McWilliams Award by the Manitoba Historical Society. Mennonite farmers can be found in dozens of countries spanning five continents in this comparative world-scale environmental history. Royden Loewen draws on a multi-year study of seven geographically distinctive Anabaptist communities around the world, focusing on Mennonite farmers in Bolivia, Canada, Indonesia, the Netherlands, Russia, the United States, and Zimbabwe. These farmers, who include Amish, Brethren in Christ, and Siberian Baptists, till the land in starkly distinctive climates; they absorb very disparate societal lessons while being shaped by particular faith outlooks, historical memory, and the natural environment. The book reveals the ways in which modern-day Mennonite farmers have adjusted to diverse temperatures, precipitation, soil types, and relative degrees of climate change. These farmers have faced broad global forces of modernization during the twentieth and early twenty-first centuries, from commodity markets and intrusive governments to technologies marked increasingly by the mechanical, chemical, and genetic. Based on more than 150 interviews and close textual analysis of memoirs, newspapers, and sermons, the narrative follows, among others, Zandile Nyandeni of Matopo as she hoes the spring-fed soils of Matabeleland's semi-arid savannah; Vladimir Friesen of Apollonovka, Siberia, who no longer heeds the dictates of industrial time of the Soviet era; state farm and Abram Enns of Riva Palacio, Bolivia, who tells how he and a horse and buggy traditionalist hired bulldozers to clear-cut a farm in the eastern lowland forests to grow soybeans, initially leading to dust-bowl conditions. As Mennonites, Loewen writes, these farmers were raised with knowledge of the historic Anabaptist teachings on community, simplicity, and peace that stood alongside ideas on place and sustainability, nonetheless conditioned by gender, class, ethnicity, race,

and local values they put their agricultural ideas into practice in remarkably diverse ways mennonite farmers is a pioneering work that brings faith into conversation with the land in distinctive ways

this book tackles the regulatory issues of unmanned aerial systems or remotely piloted aerial systems (RPAS) which have profound consequences for privacy, security, and other fundamental liberties collectively known as drones. They were initially deployed for military purposes: reconnaissance, surveillance, and extrajudicial executions. Today, we are witnessing a growth of their use into the civilian and humanitarian domain. They are increasingly used for goals as diverse as news gathering, aerial inspection of oil refinery flare stacks, mapping of the Amazonian rain forest, crop spraying, and search and rescue operations. The civil use of drones is becoming a reality in the European Union and in the US. The drone revolution may be a new technological revolution. Proliferation of the next generation of recreational drones shows how drones will be sold as any other consumer item. The cultural perception of the technology is shifting as drones are increasingly being used for humanitarian activities on one hand, but they can also firmly be situated in the prevailing modes of postmodern governance on the other hand. This work will be of interest to researchers in criminology and criminal justice interested in issues related to surveillance, security, privacy, and technology. It will also provide a criminological background for related legal issues such as privacy law, aviation law, international criminal law, and comparative law.

e revisionist e or e alternative e historians have increasingly

questioned elements of the singapore story the master narrative of the nation s political and socioeconomic development since its founding by the british in 1819 much criticism focuses especially on one defining episode of the story the internal security dragnet mounted on 2 february 1963 against communist united front elements on the island known to posterity as operation coldstore the revisionists claim that coldstore was mounted for political rather than security reasons and actually destroyed a legitimate progressive left opposition personalized by the charismatic figure of lim chin siong rather than a dangerous communist network as the conventional wisdom holds relying on both declassified and some previously unseen classified sources this book challenges revisionist claims reiterating the historic importance of coldstore in helping pave the way for singapore s remarkable journey from third world status to first in a single generation
