My Best Friend's Exorcism

2016-05-17

soon to be a major motion picture this enhanced digital edition features tons of totally awesome 80s bonus materials including satanic panic educational pamphlets a do it yourself exorcism cheat sheet a spotify playlist of awesome 80s tunes animated cover artwork and much more from the new york times best selling author of the southern book club s guide to slaying vampires this unholy hybrid of beaches and the exorcist blends teen angst and unspeakable horrors into a pulse pounding supernatural thriller the year is 1988 high school sophomores abby and gretchen have been best friends since fourth grade but after an evening of skinny dipping goes disastrously wrong gretchen begins to act different she s moody she s irritable and bizarre incidents keep happening whenever she s nearby abby s investigation leads her to some startling discoveries and by the time their story reaches its terrifying conclusion the fate of abby and gretchen will be determined by a single question is their friendship powerful enough to beat the devil

Natural Capital

2011-04-07

in 2005 the millennium ecosystem assessment ma provided the first global assessment of the world s ecosystems and ecosystem services it concluded that recent trends in ecosystem change threatened human wellbeing due to declining ecosystem services this bleak prophecy has galvanized conservation organizations ecologists and economists to work toward rigorous valuations of ecosystem services at a spatial scale and with a resolution that can inform public policy the editors have assembled the world s leading scientists in the fields of conservation policy analysis and resource economics to provide the most intensive and best technical analyses of ecosystem services to date a key idea that guides the science is that the modelling and valuation approaches being developed should use data that are readily available around the world in addition the book documents a toolbox of ecosystem service mapping modeling and valuation models that both the nature conservancy and the world wide fund for nature wwf are beginning to apply around the world as they transform conservation from a biodiversity only to a people and ecosystem services agenda the book addresses land freshwater and marine systems at a variety of spatial scales and includes discussion of how to treat both climate change and cultural values when examining tradeoffs among ecosystem services

Music

2016-06-03

music a social experience offers a topical approach for a music appreciation course through a series of subjects from music and worship to music and war and music and gender the authors present active listening experiences for students to experience music s social and cultural impact the book offers an introduction to the standard concert repertoire but also gives equal treatment to world music rock and popular music and jazz to give students a thorough introduction to today s rich musical world through lively narratives and innovative activities the student is given the tools to form a personal appreciation and understanding of the power of music the book is paired with an audio compilation featuring listening guides with streaming audio short texts on special topics and sample recordings and notation to illustrate basic concepts in music there is not a cd set but the companion website with streaming audio is provided at no additional charge

Journal of Land Use & Environmental Law

2006

translating technology in africa brings together authors from different disciplines who engage with science and technology studies sts to stimulate curiosity about the diversity of sociotechnical assemblages on the african continent the contributions provide detailed praxeographic examinations of technologies at work in postcolonial contexts the series of 5 volumes aims to catalyse the development of a field of research that is still in its infancy

in africa and promises to offer novel insights into past present and future challenges and opportunities facing the continent the first volume on metrics explores practices of quantification and digitisation the chapters examine how numbers are aggregated and how the resulting metrics shape new realities contributors include kevin p donovan véra ehrenstein jonathan klaaren emma park helen robertson rené umlauf and helen verran

1945

ecological economics for the anthropocene provides an urgently needed alternative to the long dominant neoclassical economic paradigm of the free market which has focused myopically even fatally on the boundless production and consumption of goods and services without heed to environmental consequences the emerging paradigm for ecological economics championed in this new book recenters the field of economics on the fact of the earth s limitations requiring a total reconfiguration of the goals of the economy how we understand the fundamentals of human prosperity and ultimately how we assess humanity s place in the community of beings each essay in this volume contributes to an emerging revolutionary agenda based on the tenets of ecological economics and advances new conceptions of justice liberty and the meaning of an ethical life in the era of the anthropocene essays highlight the need to create alternative signals to balance one dimensional market price measurements in judging the relationships between the economy and the earth s life support systems in a lively exchange the authors question whether such ideas as ecosystem health and the environmental data that support them are robust enough to inform policy essays explain what a taking it slow or no growth approach to economics looks like and explore how to generate the cultural and political will to implement this agenda this collection represents one of the most sophisticated and realistic strategies for neutralizing the threat of our current economic order envisioning an earth embedded society committed to the commonwealth of life and the security and true prosperity of human society

Understanding the Impact and Invasion Success of Aquatic Non-native Species: How they Interact with Novel Environments and Native Biota

2022-01-18

world human population is expected to reach upwards of 9 billion by 2050 and then level off over the next half century how can the transition to a stabilizing population also be a transition to sustainability how can science and technology help to ensure that human needs are met while the planet s environment is nurtured and restored our common journey examines these momentous questions to draw strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being the book argues that societies should approach sustainable development not as a destination but as an ongoing adaptive learning process speaking to the next two generations it proposes a strategy for using scientific and technical knowledge to better inform future action in the areas of fertility reduction urban systems agricultural production energy and materials use ecosystem restoration and biodiversity conservation and suggests an approach for building a new research agenda for sustainability science our common journey documents large scale historical currents of social and environmental change and reviews methods for what if analysis of possible future development pathways and their implications for sustainability the book also identifies the greatest threats to sustainabilityâ in areas such as human settlements agriculture industry and energyâ and explores the most promising opportunities for circumventing or mitigating these threats it goes on to discuss what indicators of change from children s birth weights to atmosphere chemistry will be most useful in monitoring a transition to sustainability

Translating Technology in Africa. Volume 1: Metrics

2023-11-13

with coverage of current issues and emerging trends fowler s zoo and wild animal medicine

volume 7 provides a comprehensive all new reference for the management of zoo and wildlife diseases a current therapy format emphasizes the latest advances in the field including nutrition diagnosis and treatment protocols cutting edge coverage includes topics such as the one medicine concept laparoscopic surgery in elephants and rhinoceros amphibian viral diseases and advanced water quality evaluation for zoos editors r eric miller and murray e fowler promote a philosophy of animal conservation bridging the gap between captive and free ranging wild animal medicine with chapters contributed by more than 100 international experts the current therapy format focuses on emerging trends treatment protocols and diagnostic updates new to the field providing timely information on the latest advances in zoo and wild animal medicine content ranges from drug treatment nutrition husbandry surgery and imaging to behavioral training coverage of species ranges from giraffes elephants lions and orangutans to sea turtles hellbenders bats kakapos and more an extensive list of contributors includes recognized authors from around the world offering expert information with chapters focusing on the latest research and clinical management of captive and free ranging wild animals a philosophy of animal conservation helps zoo and wildlife veterinarians fulfill not only the technical aspects of veterinary medicine but contribute to the overall biological teams needed to rescue many threatened and endangered species from extinction all content is new with coverage including coverage of cutting edge issues such as white nose disease in bats updates on ebola virus in wild great apes and chytrid fungus in amphibians full color photographs depict external clinical signs for more accurate clinical recognition discussions of the one medicine concept include chapters addressing the interface between wildlife livestock human and ecosystem health new sections cover edentates marsupials carnivores perrissodactyla and camelids over 100 new tables provide a quick reference to a wide range of topics an emphasis on conserving threatened and endangered species globally involves 102 expert authors representing 12 different countries

this book presents the current approaches for insect pest control as a green alternative to classical and more toxic agrochemicals an overview of the recent advances in insecticide chemistry is also included which will be of interest to a vast group of researchers agrochemists biochemists chemists and toxicologists the combination of both chemical and toxicological aspects of insecticides is unique and the book includes contributions from synthetic chemists entomologists environmentalists and toxicologists giving it wide appeal throughout the book the different approaches that involve greener chemicals are emphasized the book is divided into 9 chapters each considering the state of art of each family of insecticides together with future expectations each chapter gives a description of useful biorational insecticides highlighting environmentally friendly processes and then the mode of action is fully described emphasizing selectivity towards targeted species finally for every family of compounds their environmental effects toxicity bioaccumulation and metabolism is considered comparing them to classical insecticides including human and environmental risk assessments in addition the formulation dispersal and persistence in the environment are covered as key aspects in developing greener agrochemicals the book also includes a general introduction to entomology with special emphasis on those insects that act as vectors in the spread of diseases insects that may be potential pests against humans and livestock are included focusing on their life cycles and physiology as a logical comprehension of mode of action of insecticides in addition there is a chapter on classical insecticides covering both approaches prior to the chemical era and classical chemical insecticides organochlorinated organophosphorus and carbamates for comparison with current trends in pest control the negative environmental effects that such insecticides have caused in nature such as poisonings bioaccumulation or toxic effects are highlighted it is hoped that the use of more specific agrochemicals and approaches may avoid or at least considerably reduce such severe and irreversible effects in nature the insecticides covered are considered from numerous points of views chemistry toxicological profile risk assessment legal status environmental behaviour and selectivity the most important families of currently used insecticides are covered and critical discussions about future perspectives are included with frequent comparisons to classical insecticides the following topics are covered in the book as greener alternatives to classical insecticides pyrethrins and pyrethroids neonicotinoids spinosins insect growth regulators botanical insecticides microbial insecticides integrated pest management programs ipm

Calcidius on Plato's Timaeus

2020-09-24

on the bicentennial of malthus legendary essay on the tendency of population to grow more rapidly than the food supply this book examines the impacts of population growth on 19 global resources and services including food fresh water fisheries jobs education income and health despite current hype of a birth dearth in parts of europe and japan the fact remains that human numbers are projected to increase by over 3 billion by 2050 populations in rapidly growing nations are in danger of outstripping the carrying capacity of their natural support systems and governments in such situations will find it increasingly hard to respond to crises such as aids food and water shortages and mass unemployment beyond malthus examines methods such as the expansion of international family planning investment in educating young people in the developing world and promotion of a shift towards smaller families which will represent the most humane response to the possible ravages of the population explosion

Sartor resartus, Heroes and hero worship, and Past and present. [3 vols. in 1].

1888

not long after the conquest the city of mexico s rise to become the crown jewel in the spanish empire was compromised by the lakes that surrounded it their increasing propensity to overflow

destroyed wealth and alarmed urban elites who responded with what would become the most transformative and protracted drainage project in the early modern america the desagüe de huehuetoca hundreds of technicians thousands of indigenous workers and millions of pesos were marshaled to realize a complex system of canals tunnels dams floodgates and reservoirs vera s candiani s dreaming of dry land weaves a narrative that describes what colonization was and looked like on the ground and how it affected land water biota humans and the relationship among them to explain the origins of our built and unbuilt landscapes connecting multiple historiographical traditions history of science and technology environmental history social history and atlantic history candiani proposes that colonization was a class not an ethnic or nation based phenomenon occurring simultaneously on both sides of an atlantic where state building and empire building were intertwined

Encyclopedia of Biodiversity

2013-02-05

in this third edition of anthropology and climate change susan crate and mark nuttall offer a collection of chapters that examine how anthropologists work on climate change issues with their collaborators both in academic research and practicing contexts and discuss new developments in contributions to policy and adaptation at different scales building on the first edition s pioneering focus on anthropology s burgeoning contribution to climate change research policy and action as well as the second edition s focus on transformations and new directions for anthropological work on climate change this new edition reveals the extent to which anthropologists contributions are considered to be critical by climate scientists policymakers affected communities and other rights holders drawing on a range of ethnographic and policy issues this book highlights the work of anthropologists in the full range of contexts as scholars educators and practitioners from academic institutions to government bodies international science agencies and foundations working in interdisciplinary research teams and with community research partners the contributions to this new edition showcase important new academic research as well as applied and practicing approaches they emphasize human agency in the archaeological record the rapid development in the last decade of community based and community driven research and disaster research provide rich ethnographic insight into worldmaking practices interventions and collaborations and discuss how and in what ways anthropologists work in policy areas and engage with regional and global assessments this new edition is essential for established scholars and for students in anthropology and a range of other disciplines including environmental studies as well as for practitioners who engage with anthropological studies of climate change in their work

Green Trends in Insect Control

2011-06-01

sustainable and circular management of resources and waste towards a green deal highlights the importance of resource recovery phosphorus management climate action clean energy transition and a circular economy the world is facing significant challenges including climate disruption environmental changes pollution and population explosion sustainable management of finite natural resources within the carrying capacity of the bio geo hydrosphere is the crux of transforming the global economy for a sustainable future moreover keeping raw materials in circulation as long as possible and minimizing the amount of waste generated has grown in significance as a part of transitioning to a circular economy ce model introduces innovative solutions in green energy transition provides case studies as examples of a circular economy implementation in selected sectors of the economy including water and wastewater raw materials and construction suggests actions to counteract climate change and its consequences for people and the planet

Environmental and Natural Resource Economics

2013-07-05

this book provides a comprehensive coverage of the biology ecology and conservation of top predators including big cats wild dogs sharks raptors marine mammals orca and others snakes and lizards and humans but it is not encyclopedic in its approach while it incorporates up to

date scholarship from practitioners working with a diversity of top predators the book is also accessible for non experts the book is illustrated with a original art and many color photographs

1984

in his final major publication ernest s tiger burch jr reconstructs the distribution of caribou herds in northwest alaska using data and information from research conducted over the past several decades as well as sources that predate western science by more than one hundred years additionally he explores human and natural factors that contributed to the demise and recovery of caribou and reindeer populations during this time burch provides an exhaustive list of published and unpublished literature and interviews that will intrigue laymen and experts alike the unflinching assessment of the roles that humans and wolves played in the dynamics of caribou and reindeer herds will undoubtedly strike a nerve supplemental essays before and after the unfinished work add context about the author the project of the book and the importance of both

The Florida Orchidist

1975

as humanity presses down inexorably on the natural world people debate the extent to which we can save the earth s millions of different species without sacrificing human economic welfare but is this argument wise must the human and natural worlds be adversaries in this book ecologist michael rosenzweig finds that ecological science actually rejects such polarization instead it suggests that to be successful conservation must discover how we can blend a rich natural world into the world of economic activity this revolutionary common ground between development and conservation is called reconciliation ecology creating and maintaining species friendly habitats in the very places where people live work or play the book offers many inspiring examples of the good results already achieved the nature conservancy for instance has a cooperative agreement with the department of defense with more than 200 conservation projects taking place on more than 170 bases in 41 states in places such as elgin air force base the human uses testing munitions profitable timbering and recreation continue but populations of several threatened species on the base such as the long leaf pine and the red cockaded woodpecker have been greatly improved the safe harbor strategy of the fish wildlife service encourages private landowners to improve their property for endangered species thus overcoming the unintended negative aspects of the endangered species act and golden gate park which began as a system of sand dunes has become through human effort a world of ponds and shrubs waterfowl and trees rosenzweig shows that reconciliation ecology is the missing tool of conservation the practical scientifically based approach that when added to the rest will solve the problem of preserving earth s species
