christian apologist ben smith believes that the creation account in genesis 1 can be read literally and historically as a real week of seven normal days without contradicting modern astronomy and geology regarding the age of the universe and earth many christians are divided over how to reconcile genesis with modern science and this book evaluates all of the major options ultimately concluding that the bible allows for an old universe and earth in a way that is also scientifically accurate a former young earth creationist smith now believes that the age of creation is not specified in the bible and therefore scientists are free to answer the question he believes that christians should not hide from the controversy over the age of the earth but should take a fresh look at the text and be impressed with its accuracy

a scientist explores the harmony between christian faith and science though some christians and many skeptics see science and christianity as locked in a never ending battle geologist gregg davidson contends that there is tremendous harmony between scripture and modern science many apparent conflicts arise when the bible is interpreted apart from its literary and historical contexts but when these are taken into account most alleged clashes resolve proceeding from a belief that scripture is inspired and without error and that god's creation should inform how we interpret the bible davidson shows that scripture and science need not disagree on issues like the age of the earth adam and eve noah's flood the origin and development of life and numerous related topics rather christians can rejoice at how god's glory is revealed in both the bible and the natural world
