The Army Communicator 1998 offers an innovative plan to eliminate inequalities in american health care and save the lives they endanger over 84 000 black and brown lives are needlessly lost each year due to health disparities the unfair unjust and avoidable differences between the quality and quantity of health care provided to americans who are members of racial and ethnic minorities and care provided to whites health disparities have remained stubbornly entrenched in the american health care system and in just medicine dayna bowen matthew finds that they principally arise from unconscious racial and ethnic biases held by physicians institutional providers and their patients implicit bias is the single most important determinant of health and health care disparities because we have missed this fact the money we spend on training providers to become culturally competent expanding wellness education programs and community health centers and even expanding access to health insurance will have only a modest effect on reducing health disparities we will continue to utterly fail in the effort to eradicate health disparities unless we enact strong evidence based legal remedies that accurately address implicit and unintentional forms of discrimination to replace the weak tepid and largely irrelevant legal remedies currently available our continued failure to fashion an effective response that purges the effects of implicit bias from american health care matthew argues is unjust and morally untenable in this book she unites medical neuroscience psychology and sociology research on implicit bias and health disparities with her own expertise in civil rights and constitutional law in a time when the health of the entire nation is at risk it is essential to confront the issues keeping the health care system from providing equal treatment to all

*Chronicle of the Horse* 1985 in the legend of veronica in early modern art katherine t brown explores the lore of the apocryphal character of veronica and the history of the true image relic as factors in the franciscans placement of her character into the via

crucis way of the cross as the sixth station in both jerusalem and western europe around the turn of the fifteenth century katherine t brown examines how the franciscans adopted and adapted the legend of veronica to meet their own evangelical goals by intervening in the fabric of jerusalem to incorporate her narrative which is not found in the gospels into an urban path constructed for pilgrims as well as in similar participatory installations in churchyards and naves across western europe this book proposes plausible reasons for the subsequent proliferation of works of art depicting veronica both within and independent of the stations of the cross from the early fifteenth through the mid seventeenth centuries this book will be of interest to scholars in art history theology and medieval and renaissance studies
