Study of the Effectiveness of State Motor Vehicle Inspection Programs. Final Report

1989

this book provides a unique map of the focus and directions of contemporary research on school leadership since 2000 in 24 countries each of these directions has its own particular cultural educational and policy history taken together the various chapters in the volume provide a rich and varied mosaic of what is currently known and what is yet to be discovered about the roles and practices of principals and their contributions to the improvement of teaching and the learning and achievement of students the particular foci and methodological emphases of the research reported illustrate the different phases in the development of educational policies and provision in each country this collection is an important addition to existing international research that has shown beyond any reasonable doubt that the influence of school principals is second only to that of teachers in their capacity to impact students progress and achievement and to promote equity and social justice

Report on Activities Under the National Traffic & Motor Vehicle Safety Act

1970

abstract this hearing discusses establishing a federal seafood inspection program to promote better health for americans and to examine how to design an inspection program how to finance it who should run it and how to coordinate it with state programs such a program could increase public confidence in seafood safety and this could mean increased public consumption of seafood which in turn means greater income for fishermen etc testimony is received from several members of congress food industry representatives and various government officials

Custom Slaughtering Operations and State Meat Inspection

1970

modern railways are no longer the sole forte of civil and mechanical engineering they now involve a broad range of multidisciplinary engineering domains from advanced computing digital telecommunications and networking to big data analytics and even artificial intelligence among the emerging technologies and innovations in railways hyperloop transportation systems employing magnetic propulsion hydrogen powered trains and autonomous intelligent systems in the control and command subsystems of railways have significant potential to improve the performance of railways in terms of speed service availability comfort sustainability and potentially safety these innovations will also help mitigate carbon emissions this volume presents the latest research on railway engineering and transportation and discusses the practices and processes involved in shaping modern railways

A Decade of Research on School Principals

2015-11-13

contains systems of records maintained on individuals by federal agencies which were published in the federal register and rules of each agency concerning the procedures the agency will use in helping individuals who request information about their records
